

A powerful identity and access management (IAM) solution to manage and secure identities across your organization.

Why is AD360 a cut above the rest?

Identity lifecycle management:

From provisioning to deprovisioning and every change in between, manage identities across Active Directory (AD), Microsoft 365, Google Workspace, and other business applications from a single window.

Identity risk assessment:

Assess potential risk indicators and obtain a risk score for your environment based on their likelihood of occurrence and impact level. Take action on the remediation measures to proactively manage and mitigate risks.

Access certification:

Sustain a secure and compliant access management system through periodic reviews of user access rights and permissions. Establish access review campaigns, reducing manual tasks, and mitigating risks.

Multi-factor authentication (MFA) for endpoints:

Secure enterprise endpoints and user identities with MFA for local and remote access to machines (Windows, macOS, and Linux), VPNs, OWA, and enterprise applications.

Single sign-on (SSO):

Secure and streamline access to cloud applications by letting users access multiple apps with a single login.

Automation and orchestration:

Implement event-driven automation policies that seamlessly execute a sequence of tasks, such as granting or revoking access across various enterprise applications.

Delegation and workflows:

Enhance administrative performance by creating custom help desk roles. Monitor tasks assigned to the help desk technicians by curating workflows.

User behavior analytics (UBA):

Secure privileged accounts, detect insider attacks, prevent identity theft, and more with UBA-powered by machine learning. Receive instant alerts on anomalous logons, privilege escalations, and other activities.

Backup and disaster recovery:

Effortlessly back up and restore AD, Azure AD, Microsoft 365, Google Workspace, Exchange, and Zoho WorkDrive data.

Other salient features

Flexible licensing model

AD360 features a suite of components to meet your IGA requirements. Pick the components you need, and pay only for them.

Simple deployment

No complicated prerequisites—deploy AD360 within minutes, and start managing identities instantly.

Easy-to-use graphical user interface

Leverage a simple and straightforward UI that makes working with the product a cakewalk.

Mobile apps

Manage identities, passwords, and much more while on the go with fully loaded Android and iOS mobile apps.

Did you know that nine out of every 10 Fortune 100 companies trust ManageEngine with their IT?

Hear it from our customers

AD360's offering [are] very good. It is an interesting mix of solutions that caters to various IGA needs arising in our environment. Both ADManager Plus and ADSelfService Plus have gone a long way to simplify and automate our IGA requirements. Product development seems active, and most importantly, ManageEngine support is responsive and helpful across all the products we use.

Clive Newport

Head of IT infrastructure and support
Vasanta Group

Just about the best piece of security software that would put a smile on any security administrator.

Jacinto Godinho

Administrator: Quality assurance and IT security
Al-Ahli Bank of Kuwait

This deployment was extremely simple and cost-effective. Installation was completed within a matter of minutes. Configuration was simple. [ManageEngine's] support team is always there every step of the way whenever we need a hand.

Patrick Hong

Help desk manager
National Veterinary Associates
