

AD360 helps Seattle Housing Authorities monitor their employees logon information

Company: Seattle Housing Authorities

Industry: Government

Country: USA

Business Needs

Established in 1939, Seattle Housing Authority (SHA) provides long-term rental housing and rental assistance to more than 29,500 people in the city of Seattle. The agency owns and operates buildings of all shapes and sizes on more than 400 sites throughout the city. SHA needed to govern their 630 employees' network login activities across 70 locations without having to verify. They were also in need of an integrated identity and access management solution for managing user identities, enforcing security, governing access to resources and to ensure compliance.

Solution

The municipal corporation decided on AD360's comprehensive Active Directory audit module that provides accurate Active Directory event details with 150+ reports and instant email alerts. The requirements for tracking various employee logons were met by Logon Activity based on IP Address, Logon Activity based on DC, User Logon Activity, Logon History, Logon Duration and many more reports. The AD changes were easy to track with the numerous ADAudit Plus reports categorized within User / Account / Group / Computer / OU / GPO management reports.

SHA went on to use the Active Directory management console of AD360 to manage user identities and the secure password management module of AD360 to enable two-factor authentication and single sign-on across their IT environment.

About AD360

AD360 is an integrated identity and access management (IAM) solution for managing user identities, governing access to resources, enforcing security, and ensuring compliance. From user provisioning, self-service password management, and Active Directory change monitoring, to single sign-on (SSO) for enterprise applications, AD360 helps you perform all your IAM tasks with a simple, easy-to-use interface.

AD360 provides all these functionalities for Windows Active Directory, Exchange Servers, and Office 365. With AD360, you can just choose the modules you need and start addressing IAM challenges across on-premises, cloud, and hybrid environments from within a single console.
