

# Compare DataSecurity Plus editions

Learn the differences between DataSecurity Plus' Free and Professional editions.

DataSecurity Plus capabilities	Free edition— Try now	Professional edition— Try now
<p><b>File server auditing</b> Audit, monitor, and alert on all file accesses and modifications made in your Windows file server environments, failover clusters, and workgroups in real time.</p>	<p>Not supported. Only retains audit data from the evaluation period.</p>	<p>Pricing starts at <b>\$745</b> for 2 file servers</p> <p><a href="#">Get quote</a></p>
<ul style="list-style-type: none"> <li>• <b>File access auditing</b> Obtain detailed information on the four Ws— who accessed what, when, and from where— for all file accesses and modifications.</li> </ul>	NA	
<ul style="list-style-type: none"> <li>• <b>File copy auditing</b> Report and alert on file copy-and-paste events in real time using predefined policies.</li> </ul>	NA	
<ul style="list-style-type: none"> <li>• <b>File integrity monitoring</b> Detect unauthorized changes to your files through continuous real-time monitoring.</li> </ul>	NA	
<ul style="list-style-type: none"> <li>• <b>Ransomware detection and mitigation</b> Detect and shut down potential ransomware attacks with an automated threat response mechanism.</li> </ul>	NA	
<ul style="list-style-type: none"> <li>• <b>File change notifier</b> Trigger instant alerts on sudden spikes in file or folder access, modifications, or permission change events.</li> </ul>	NA	
<ul style="list-style-type: none"> <li>• <b>Forensic analysis</b> Get actionable, accurate audit data to analyze all security incidents.</li> </ul>	Yes, using the audit data from evaluation period.	
<ul style="list-style-type: none"> <li>• <b>Data archiving</b> Retain audit data using DataSecurity Plus' retention capabilities.</li> </ul>	Yes, but only for the last 30 days.	
<ul style="list-style-type: none"> <li>• <b>Custom reports and schedules</b> Automate report generation, and email or export custom reports.</li> </ul>	NA	

<b>Data leak prevention</b> Detect, disrupt, and respond to sensitive data leaks via USB, email, printer, and more through security monitoring.	No of workstations supported - 50	Pricing starts at <b>\$345</b> for 100 workstations <a href="#">Get quote</a>
<ul style="list-style-type: none"> <li>• <b>Content-aware protection</b>  Monitor, analyze, and report when sensitive data (PII/ePHI) is being copied or transmitted over any of the following:   <b>Distributed machines:</b> laptops, desktops.   <b>Applications:</b> Outlook.   <b>Removable storage:</b> USB, SD cards, camera.   <b>Virtual desktops:</b> Citrix, VMWare (provided the OS installed is Windows 2003 or above).   <b>Others:</b> Print, clipboard, fax, network shares. </li> </ul>		
<ul style="list-style-type: none"> <li>• <b>Automated incident remediation</b>  Block, delete, and quarantine files with predefined active remediations. </li> </ul>		
<ul style="list-style-type: none"> <li>• <b>Workstation auditing</b>  Audit all file accesses and modifications across your Windows endpoints in real time </li> </ul>		
<ul style="list-style-type: none"> <li>• <b>End-user education and awareness</b>  Use on-screen pop-up messages to inform and warn users about policy violations. </li> </ul>		
<ul style="list-style-type: none"> <li>• <b>Real-time email alerts</b>  Alert data owners or admins in the event of policy violations. </li> </ul>		
<ul style="list-style-type: none"> <li>• <b>Real-time workstation security monitoring</b>  Ensure the integrity of data stored on your endpoints. </li> </ul>		

<b>Data risk assessment</b> Perform content inspection and contextual analysis to discover and classify files based on their sensitivity and vulnerability.	Supported data size - 100 GB	Pricing starts at <b>\$395</b> for 2 TB of scanned data <a href="#">Get quote</a>
<ul style="list-style-type: none"> <li>• <b>Data discovery</b> Find, analyze, and track sensitive personal data—also known as PII/ePHI—stored in a file servers, Failover clusters, and OneDrive environments.</li> </ul>	✓	✓
<ul style="list-style-type: none"> <li>• <b>Advanced content filtering</b> Detect high-risk data using specific keywords, regular expressions, pattern algorithms, or a combination of these to reduce false positives.</li> </ul>	✓	✓
<ul style="list-style-type: none"> <li>• <b>Risk-based data classification</b> Identify the most vulnerable data using both content and context parameters.</li> </ul>	✓	✓
<ul style="list-style-type: none"> <li>• <b>Automated incident response</b> Remediate policy violations with options to delete, quarantine, or block files.</li> </ul>	✓	✓
<ul style="list-style-type: none"> <li>• <b>Single, web-based console</b> Create and define your own policies and rules, respond to incidents raised, report file events, and more—all from a single console.</li> </ul>	✓	✓
<ul style="list-style-type: none"> <li>• <b>File tagging capabilities</b> Use both automated and manual file tagging capabilities to classify files faster and reduce the burden on the admin.</li> </ul>	✓	✓
<ul style="list-style-type: none"> <li>• <b>Incremental file scan</b> Scan only new or modified files.</li> </ul>	✓	✓
<ul style="list-style-type: none"> <li>• <b>File type recognition</b> Scan sensitive content from over 50 file types, including email, text, compressed, and more.</li> </ul>	✓	✓
<ul style="list-style-type: none"> <li>• <b>Compliance management</b> Use more than 10 predefined policies and over 100 rule templates to help comply with multiple mandates, including the GDPR, PCI, HIPAA, and SOX.</li> </ul>	✓	✓

<b>File analysis</b> Analyze, identify, and discard unneeded data to declutter storage space.	Supported data size - 500GB	Pricing starts at <b>\$95</b> for <b>1TB of scanned data</b> <a href="#">Get quote</a>
<ul style="list-style-type: none"> <li>• <b>ROT data analysis</b>                Manage redundant, obsolete, and trivial (ROT) data; find duplicate files; and more.</li> </ul>		
<ul style="list-style-type: none"> <li>• <b>Storage analyzer</b>                Analyze growth trends and disk usage patterns; send alerts when free space falls below pre-configured limits.</li> </ul>		
<ul style="list-style-type: none"> <li>• <b>Permissions analyzer</b>                Examine security permissions, identify overexposed files, and find out who has access to do what to your sensitive files.</li> </ul>
