

Comparison Document

Differences between Log360 modules and their Standalone Editions.

M365 Manager Plus

M365 Manager Plus is an extensive Office 365 tool for reporting, managing, monitoring, auditing, and creating alerts for critical activities.

When to choose what?

If you want to ingest security related log data from Exchange Online and Azure Active Directory environments, then choose M365 Manager Plus add-on for Log360.

If you are looking for a solution to report, audit, monitor and manage Microsoft 365 services such as Exchange Online, Azure Active Directory, Skype for Business, OneDrive for Business, and Microsoft Teams, then standalone M365 Manager Plus is the solution for you.

The table below differentiates between the functionalities of M365 reporting add-on of Log360 and the standalone M365 Manager Plus solution.

Feature	M365 Manager Plus in Log360	M365 Manager Plus Standalone Edition
Support of Services

Yammer	✗	✓

Functionality		
Auditing		
Alerting		
Help-desk delegation		
Management		
Monitoring		
Reporting		
Mailbox content search		
Automation		

ADManager Plus

ADManager Plus is a unified Active Directory (AD), Exchange, and Microsoft 365 management and reporting solution that allows IT administrators and technicians to manage AD objects easily and generate instant reports.

When to choose what?

If you are looking to report your Active Directory environment for security and compliance, then the real-time AD reporting module in Log360 is the perfect add-on for you.

If you are looking for a complete Active Directory management, auditing and reporting solution, then deploying ADManager Plus as a standalone is recommended for you.

The table below differentiates between the functionalities of AD reporting add-on of Log360 and the ADManager Plus standalone solution..

Feature	AD reporting add-on of Log360	Standalone ADManager Plus
Support of platforms		
Active Directory	✓	✓
Office 365	✗	✓
Microsoft Exchange	✗	✓
Functionality		
Management	✗	✓
Reports	✓	✓

Workflow	✗	✓
Automation	✗	✓
Backup	✗	✓

Exchange Reporter Plus

Exchange Reporter Plus is a comprehensive Exchange reporting and monitoring software that provides predefined reports on every aspect of Microsoft Exchange Servers, Exchange Online, and Skype for Business environments.

When to choose what?

If you want to audit Exchange Server alone, then Exchange Reporter Plus add-on in Log360 that audits, reports and alerts you in real time, is a useful addition.

If you want to audit, monitor, and get reports on Exchange Server, Exchange Online, and Skype for Business, then Standalone Exchange Reporter Plus is the solution for you.

The table below differentiates between the functionalities of Exchange Server reporting add-on of Log360 and the standalone Exchange Reporter Plus solution.

Feature	Exchange Reporter Plus in Log360	Exchange Reporter Plus Standalone Edition
Support of platforms		
Exchange Online	✗	✓
Exchange Server	✓	✓
Skype for Business	✗	✓
Functionality		
Auditing	✓	✓
Alerting	✓	✓
Monitoring	✗	✓
Reporting	✓	✓

ManageEngine Log360

Log360, an integrated solution that combines ADAudit Plus, EventLog Analyzer, DataSecurity Plus, Exchange Reporter Plus, and O365 Manager Plus into a single console, is the one-stop solution for all log management and network security challenges. This solution offers real-time log collection, analysis, monitoring, correlation, and archiving capabilities that help protect confidential data, thwart internal security threats, and combat external attacks. Log360 comes with over 1,200 predefined reports and alert criteria to help enterprises meet their most pressing security, auditing, and compliance demands.
