ManageEngine Log360

Enhance Nginx security and performance with Log360

How this extension helps

ManageEngine Log360, collects analyzes, and correlates log data from Nginx to enhance security monitoring and performance analysis. The solution provides deep visibility into web traffic, request patterns, and server behavior. It helps IT teams detect anomalies, prevent unauthorized access, and optimize server performance.
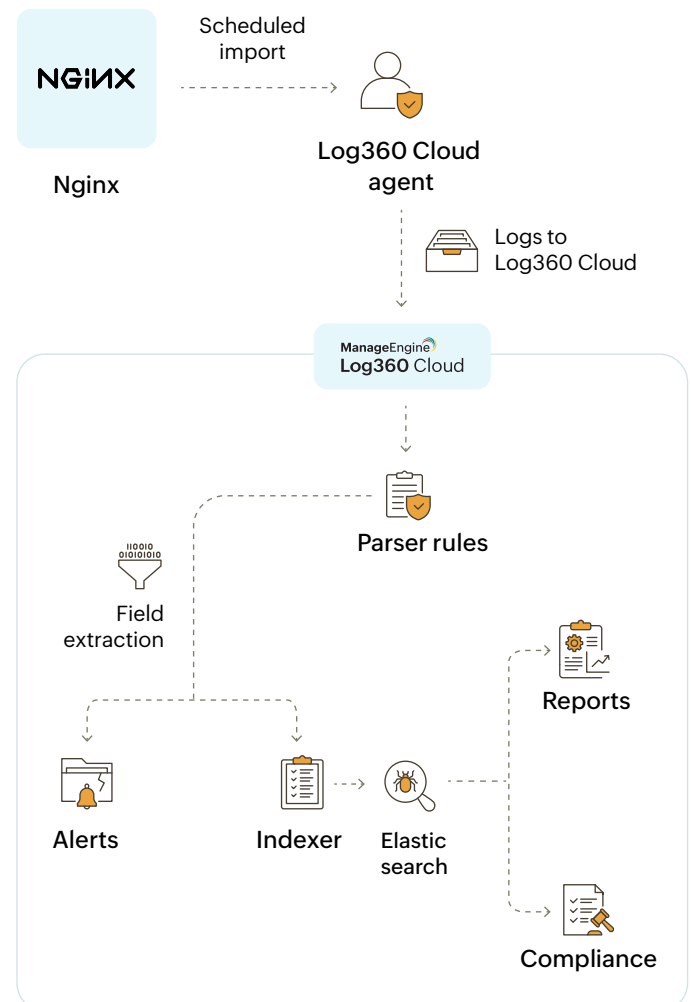

Key capabilities:

✓ **Track web server activity**

Monitor overall web server traffic, request rates, URI access, virtual server activity, and SSL trends.

✓ **Identify performance bottlenecks**

Detect slow URI paths, virtual servers, and top clients generating 4xx errors, providing insights into potential abuse.

✓ **HTTP status code monitoring**

Analyze success rates, redirections, client/server errors, and informational responses for improved visibility.

✓ **Optimize upstream requests**

Monitor and analyze upstream requests, redirections, and cache efficiency to ensure optimal server performance and security.

✓ **Enhance load balancing**

Evaluate upstream requests and redirections to improve server load distribution and response times.

✓ **Improve cache efficiency**

Reduce unnecessary overhead and optimize server performance by monitoring cache usage and effectiveness.

About Log360:

Log360 is a unified security platform designed for scalability, customization, and seamless integration, allowing organizations to adapt it to their unique network environments. It combines advanced threat detection, log management, user behavior analytics, and compliance reporting into a single console. Supporting on-premises, cloud, and hybrid infrastructures, Log360 enables security teams to ingest, analyze, and correlate data in real time for proactive threat detection and incident response.

About Nginx

Nginx is a high-performance, open-source web server and reverse proxy server designed for handling large volumes of traffic efficiently. It is widely used for load balancing, caching, and serving static content.

Built by: ManageEngine

Category: Web server

Secure your Nginx server with Log360
