ManageEngine Announced as Finalist for Best of Interop 2012

InformationWeek Reports and Interop Las Vegas Recognize ManageEngine for Leading Innovation in the Business Technology Market

Interop Las Vegas 2012

PLEASANTON, Calif.--(BUSINESS WIRE)--ManageEngine, the real-time IT management company, today announced it has been selected as a Best of Interop finalist for the Security award category, recognizing ManageEngine's technological advancements in this specific category. The Best of Interop winners will be announced on Tuesday, May 8, at 3:00 p.m. on the expo floor during [Interop Las Vegas](#), happening May 6-10, 2012, at the Mandalay Bay Convention Center. For more information, visit <http://www.bestofinterop.com/>.

"With Firewall Analyzer, we want to help network security administrators and IT managers efficiently monitor firewall security events and visualize their overall enterprise network security," said Pravin Kumar, product manager, ManageEngine Firewall Analyzer. "The recognition from the InformationWeek Reports editors and analysts as a Best of Interop 2012 Award finalist is a testament to our ability to deliver an innovative security product and confirms that we're doing our job well."

ManageEngine will showcase [Firewall Analyzer](#) at Interop Las Vegas, the leading global business technology event. The Best of Interop Judging Committee, comprised of InformationWeek Reports editors and analysts, reviewed over 130 entries and selected finalists based on the products with the most significant technical impact with the most potential of advancing the business technology market.

"The Best of Interop Awards are an indicator of the most innovative and exciting offerings available in the business technology marketplace, and this year's finalists have truly demonstrated their commitment to the industry," said Art Wittmann, vice president and director, InformationWeek Reports. "We want to applaud each of the participating companies for their advancements in technology and capturing the spirit of innovation."

The eight category areas that Best of Interop finalists were selected for include:

- Cloud Computing and Virtualization
- Collaboration
- Data Center and Storage
- Management, Monitoring and Testing
- Networking
- Performance Optimization
- Security
- Wireless and Mobility

In addition to these eight specific category areas, there will be two special awards chosen: an overall "Best of Interop" and "Best Startup Company."

About InformationWeek Reports

InformationWeek Reports is the leading resource for peer-driven research, providing business technology professionals with the real-world analysis and perspective they need to run better, smarter IT organizations. InformationWeek Reports content is written and produced by an analyst team comprised of practicing senior IT professionals and InformationWeek's world-class editors. Featuring a combination of quantitative research and qualitative real-world analysis, coupled with technology-adoption best practices, the InformationWeek Reports' site boasts more than 900 reports and briefs written specifically for and by IT professionals. InformationWeek Reports is part of the InformationWeek Business Technology Network. For more information, visit www.reports.informationweek.com.

About Interop®

Interop® drives the adoption of technology, providing knowledge and insight to help IT and corporate decision-makers achieve business success. Part of UBM TechWeb's family of global brands, Interop is the leading business technology event series. Through in-depth educational programs, workshops, real-world demonstrations and live technology implementations in its unique InteropNet program, Interop provides the forum for the most powerful innovations and solutions the industry has to offer. Interop Las Vegas is the flagship event held each spring, with Interop New York held each fall, with annual international events in Mumbai and Tokyo, all produced by UBM TechWeb and partners. For more information about these events visit, www.interop.com.

About ManageEngine Firewall Analyzer

ManageEngine Firewall Analyzer is a web-based tool for change management, configuration analysis, security audit of firewall devices, bandwidth monitoring and security reporting. The software application analyzes the firewall device configurations, manages the configuration changes and audits security of devices. It collects, analyzes and archives logs from network perimeter security devices and generates **reports**. The **devices supported** include firewalls, proxy servers, intrusion detection systems (IDS)/intrusion prevention systems (IPS) and virtual private networks (VPNs). The salient features of the application are firewall device management, bandwidth monitoring and security reports. For more information on ManageEngine Firewall Analyzer, please visit www.fwanalyzer.com.

About ManageEngine
