

MANAGEENGINE

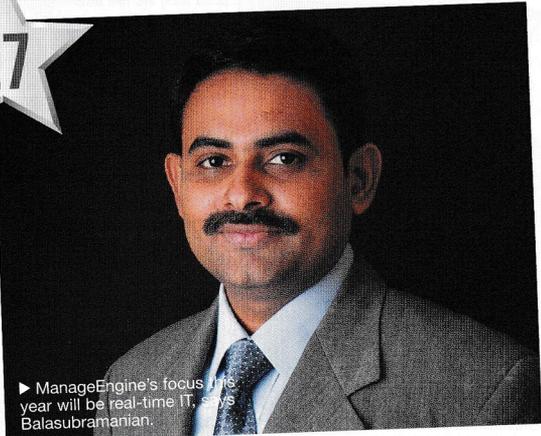

ManageEngine will showcase its expertise in IT management at GITEX Technology Week 2014. The company will display its entire portfolio of IT management products, hold product demonstrations, display recent product enhancements and feature additions, and meet customers and partners.

"ManageEngine will be exhibiting its entire portfolio of IT infrastructure management solutions at this year's show," said V Balasubramanian,

marketing manager (IT Security) at ManageEngine.

He said the IT environment in organisations today is more dynamic and enterprises require dynamic approaches to ensure efficiency. "ManageEngine's focus for GITEX this year will be 'real-time IT,'" he said. "Without real-time responsiveness and end-to-end visibility into all aspects of the enterprise infrastructure, IT can suffer huge losses that could damage a firm's share and brand value." Balasubramanian said.
