ManageEngine EventLog Analyzer Receives Fourth Consecutive WindowSecurity.com Readers' Choice Award

PLEASANTON, Calif.--(BUSINESS WIRE)--ManageEngine, the real-time IT management company, today announced that its log analytics and compliance reporting product, EventLog Analyzer, has been selected as the second runner-up in the Event Log Monitoring category of the WindowSecurity.com Readers' Choice Awards. This is the fourth consecutive year that EventLog Analyzer has made it to the top three, having won the award in 2010.

Designed to unlock the business value of machine-generated logs, EventLog Analyzer provides a quick and powerful way to collect, analyze, report and archive logs from heterogeneous systems, devices and applications. Thousands of network administrators and IT infrastructure service providers use EventLog Analyzer for internal threat monitoring and meeting regulatory compliance IT audits.

"We are honored to receive the WindowSecurity.com Readers' Choice Award for the fourth consecutive year. Being voted by security administrators and network specialists confirms our growing ability to deliver innovative technology and a quality product," said Chenthil Kumaran, product manager, ManageEngine EventLog Analyzer.

WindowSecurity.com conducts monthly polls to discover which product network security administrators, in a particular category of third-party network security solutions, prefer. The awards draw a huge response per category and are based entirely on the visitors' votes.

"Our Readers' Choice Awards give visitors to our site the opportunity to vote for the products they view as the very best in their respective category," said Sean Buttigieg, WindowSecurity.com manager. "WindowSecurity.com users are specialists in their field who encounter various network security solutions at the workplace. The award serves as a mark of excellence, providing the ultimate recognition from peers within the industry."

About WindowSecurity.com

WindowSecurity.com (http://WindowSecurity.com) is a Microsoft Windows Security resource site. It is the leading Windows Security site, attracting over 250,000 Security administrators and specialists a month. The site provides the latest Windows Security Services, articles and tutorials by leading Windows Security experts, message boards, software listings and product reviews.

WindowSecurity.com forms part of a group of sites run by TechGenix Ltd., including http://www.windowsnetworking.com, a comprehensive Windows Networking resource site; http://www.msexchange.org, a Microsoft Exchange Server resource site; http://www.virtualizationadmin.com, a Server Based Computing resource site; http://www.isaserver.org, a Microsoft ISA Server resource site; and http://www.mspanswers.com, a Managed Service Providers resource site.

About ManageEngine EventLog Analyzer

ManageEngine EventLog Analyzer is web-based, real-time, agent-less (optional agents available) system log and application log monitoring and management software. The EventLog Analyzer software collects, analyzes, reports and archives event logs from distributed Windows hosts; SysLogs from distributed UNIX hosts, routers, switches and other SysLog devices; and application logs from IIS Web server, IIS FTP server, Apache Web server, Print server, MS SQL server, Oracle database server, DHCP Windows and DHCP Linux servers. The EventLog Analyzer application generates graphs and reports that help in analyzing system problems with minimal impact on network performance. For more information on ManageEngine EventLog Analyzer, please visit http://www.manageengine.com/products/eventlog.
