

ManageEngine Firewall Analyzer, EventLog Analyzer Win Gold, Silver, Bronze in 9th Annual 2013 Security Industry's Global Excellence Awards

Tuesday, March 05, 2013 10:30 AM

Email Print Tweet

ManageEngine, the real-time IT management company, today announced that Info Security Products Guide, the industry's leading information security research and advisory guide, has honored the company with four wins in the 2013 Global Excellence Awards.

- ▶ Gold and Bronze – Firewall Analyzer, the firewall log and configuration monitoring software, is a Bronze winner for Most Innovative Security Product (Software) and a Gold winner for Best Deployment and Case Studies Asia-Pacific.
- ▶ Silver and Bronze -- EventLog Analyzer, the IT compliance and event log management software for SIEM, is a Silver winner for Security Information/Event Management (SIEM) and a Bronze winner for Best Deployment and Case Studies USA.

The security industry celebrated its 9th Annual 2013 Global Excellence Awards in San Francisco by honoring excellence in every facet of the industry including products, people behind the successes and best companies.

More than 50 judges from a broad spectrum of industry voices from around the world participated, and their average scores determined the 2013 Global Excellence Awards finalists and winners. Winners were announced during the awards dinner and presentation on February 27, 2013, in San Francisco attended by the finalists, judges and industry peers.

"Thousands of organizations across the globe rely on EventLog Analyzer and Firewall Analyzer to ensure enterprise IT security," said Ajay Kumar, product marketing manager, ManageEngine. "Info Security Products Guide's recognition is a great honor and further endorsement of our success in creating security products that are ahead of the curve and that provide the highest possible levels of security for cost-conscious enterprises."

Firewall Analyzer is agent-less log analytics and configuration change management software for network security devices. Over 3,500 organizations worldwide use Firewall Analyzer to monitor their network perimeter infrastructure in real time. Security administrators and MSSPs use Firewall Analyzer for end-point security monitoring and analysis, change management, employee Internet monitoring, bandwidth monitoring, capacity planning, policy enforcement, and security and compliance audit reporting. Firewall Analyzer is vendor-agnostic and supports most commercial and open source network firewalls, IDS/IPS, VPNs, proxies and related perimeter security devices.

EventLog Analyzer is award-winning SIEM software used by over 4,500 organizations worldwide to meet IT security audit and log management challenges. EventLog Analyzer lets organizations automate the entire process of managing terabytes of machine-generated logs by collecting, analyzing, searching, reporting and archiving from a central location. In turn, enterprises can mitigate internal threats, conduct log forensics, monitor privileged users and comply with HIPAA, SOX, FISMA, GLBA, PCI and other IT regulatory mandates by intelligently analyzing and reporting on enterprise systems, applications, devices and other custom log events.
