ManageEngine IT360 Integrated IT Management Now Available for the iPad

Company Sees 600 Percent Increase in Visitors Accessing Product Demos via Mobile Devices

PLEASANTON, Calif., May 10, 2012 (BUSINESS WIRE) - - --Live demo of the latest version of IT360 from an iPad: http://ow.ly/aGQkM

--New HTML5-based topology maps provide visual representation of IT landscape

--New self-diagnostic feature improves troubleshooting and reduces downtime

ManageEngine, the real-time IT management company, today announced significant updates to IT360, its integrated IT management solution. Enhancements include the general availability of an iPad extension, providing customers with the ability to monitor their IT infrastructure from an Apple iPad, including alarms, business services and infrastructure snapshots. IT360 also introduces topology maps and self-diagnostic capabilities.

"Mobile is a key focus area for us at ManageEngine as global trends continue to indicate explosive growth and adoption of mobile devices within enterprises," said Sridhar Iyengar, vice president, product management at ManageEngine. "Our study and analysis of unique visitors accessing ManageEngine product demos using mobile devices has shown an increase of over 600 percent, a clear indication of where the market is headed. Expect to see an increasing number of ManageEngine solutions with comprehensive mobile support in the coming months."

The new IT360 web extension for the iPad lets IT professionals go mobile, extending the

iPad support in February 2012 at the Mobile World Congress in Barcelona, Spain.

Based on popular demand from ManageEngine's enterprise and MSP customers, IT360 now allows users to see a visual representation of their IT infrastructure based on topology maps. The feature is designed using HTML5 technology, ideal for many customers viewing IT360 on their iOS devices.

IT360 also includes a self-diagnostic feature to improve product reliability and help customers significantly reduce downtime. Self-diagnostic tools provide a simple interface to enable users to troubleshoot problems faster so that they no longer have to rely on long and highly technical log files to fix issues.

Pricing and Availability

You can view a live demo of the IT360 version 9.0.5 at http://ow.ly/aGQgi , or use your iPad to view a live demo at http://ow.ly/aGQkM . IT360 is available immediately to download at http://ow.ly/aPd7T . For pricing, please visit http://ow.ly/aPdrv .

About ManageEngine IT360

The IT360 dashboard provides a 360-degree view across IT to proactively monitor performance. It is designed to monitor and manage IT infrastructures for medium and large enterprises, and adds a business context to monitoring IT resources to help the various stakeholders understand the impact of downtimes on the business. IT360 comprises network performance, server and application performance, database performance, and end-user experience management for IT operations and an ITIL helpdesk for IT service management, all in one product. In addition to direct use by enterprises, IT360 is also available for MSPs who offer IT management. The latest version of IT360 will feature support for the management console on an iPad in addition to other features. IT360, with the latest iPad support, will ensure that business and IT users can keep track of key IT metrics and make informed and meaningful decisions in real time, anytime and anywhere, to ensure business continuity. For more information, please visit http://www.manageengine.com/it360/ .
