

ManageEngine Joins the Cisco Developer Network as a Registered Developer and Completes Cisco Interoperability Verification Testing

Press Release: ManageEngine - Tue 15 May, 2012 6:45 PM IST

Recommend Tweet 0 Share Email Print

PLEASANTON, Calif.--(BUSINESS WIRE)--

ManageEngine, the real-time IT management company, today announced that it has joined the Cisco Developer Network as a Registered Developer within the Cisco Application Velocity and Network Software and Systems technology categories. In addition, ManageEngine NetFlow Analyzer has successfully completed interoperability testing with Cisco NetFlow, Cisco IPSLA, Cisco WAAS and Cisco Medianet 2.0.

The Cisco Developer Network unites Cisco with third-party developers of hardware and software to deliver tested interoperable solutions to joint customers. As a Registered Developer, ManageEngine offers a complementary product offering and has started to collaborate with Cisco to meet the needs of joint customers. With offerings such as ManageEngine NetFlow Analyzer, customers can more quickly deploy a broad range of Cisco Compatible business applications, devices or services that can enhance the capabilities, performance and management of their Cisco network. For more information on ManageEngine NetFlow Analyzer interoperability with Cisco NetFlow, Cisco IPSLA, Cisco WAAS and Cisco Medianet 2.0, go to <https://marketplace.cisco.com/catalog/products/1731>.

Note: Interoperability testing is designed to simulate typical customer configurations and does not replace the need for on-site testing in conjunction with actual implementation.

Pricing and Availability

ManageEngine NetFlow Analyzer starts at \$795 USD and is available for download at <http://www.manageengine.com/netflow>. A 30-day trial with full functionality is also available for evaluation.

About ManageEngine NetFlow Analyzer

ManageEngine NetFlow Analyzer is a powerful traffic analysis and network forensic tool that collects Cisco NetFlow, IPFIX, sFlow, jFlow, cflowd, NetStream, Cisco NBAR, and CBQoS data to provide unparalleled visibility into your network. With real-time bandwidth usage reports on top applications, conversations and hosts, NetFlow Analyzer gives valuable insight into bandwidth usage in the enterprise without the complexity and expense involved in deploying hardware probes. The new version of ManageEngine NetFlow Analyzer can be downloaded directly from the company's website at <http://www.manageengine.com/netflow/>. For more information on the product, email us at netflowanalyzer-support@manageengine.com.

About ManageEngine

ManageEngine delivers the real-time IT management tools that empower an IT team to meet an organization's need for real-time services and support. Worldwide, more than 60,000 established and emerging enterprises – including more than 60 percent of the Fortune 500 – rely on ManageEngine products to ensure the optimal performance of their critical IT infrastructure, including networks, servers, applications, desktops and more. ManageEngine is a division of Zoho Corp. with offices worldwide, including the United States, United Kingdom, India, Japan and China. For more information, please visit <http://www.manageengine.com/>; follow the company blog at <http://blogs.manageengine.com/>, on Facebook at <http://www.facebook.com/ManageEngine> and on Twitter at @ManageEngine.
