PLEASANTON, Calif.--(BUSINESS WIRE)--

ManageEngine, the real-time IT management company, today announced that its enterprise privileged password management solution Password Manager Pro, added 45 percent more customers to its global customer base in 2012. The soaring customer base is driven by robust growth in multiple countries across the globe, confirming Password Manager Pro's leadership position in privileged identity management.

The exploding demand for Password Manager Pro can be attributed to several industry trends and recent events. The 2012 "Summer of Hackers" raised awareness about the risks of weak passwords in a series of criminal hacks against Yahoo!, LinkedIn, eHarmony and other high-profile companies. Similarly, the continued proliferation of password-protected IT assets is making privileged password management a tedious and time-consuming headache for IT teams of all sizes.

Password Manager Pro won the goodwill of SMBs as well as a great number of large enterprises in 2012 as they sought to control access to the massive IT infrastructure of their complex data centers. The list of new account large enterprises includes the IT divisions of over a dozen Fortune 500 corporations and three of the world's largest organizations in software, retail and virtualization. Of the new customers, 25 percent are enterprise organizations and the rest are SMBs. Technology, banking and financial services, education, healthcare and government were the dominant markets served.

"Privileged passwords that grant unlimited access privileges are aptly referred to as the keys-to-the-kingdom. A haphazard style of privileged password management often lies at the root of cyber security incidents," said Rajesh Ganesan, director of product management at ManageEngine. "With cyber-threats looming large, IT divisions of enterprises of all types, sizes and domains are now paying serious attention to shared administrative password management. Password Manager Pro perfectly meets industry requirements and comes as a 'must-have' solution."

On a typical day, more than 50,000 administrators and 150,000 users log in to Password Manager Pro and manage millions of privileged passwords. Password Manager Pro has maintained momentum as a privileged password management solution by continuously rolling out innovative features and enhancements to help enterprises bolster internal security, thereby delivering great value to customers.

In 2012, Password Manager Pro became the first solution to offer both privileged identity management and session management in a single, unified solution. Other major enhancements announced during 2012 included:

- First-in-class, no-frills auto logon for launching Windows RDP and SSH terminal sessions.
- Provision to completely video record, archive and play back privileged sessions launched from the product.
- Secure offline access with provision to automatically synchronize to users' mobile devices.
- One-click auto logon to auto-fill the login page of web applications with appropriate username/password information.

By keeping customers highly satisfied, Password Manager Pro has achieved an impressive renewal rate, in addition to winning new accounts.

Pricing and Availability

Password Manager Pro 6.8 is available immediately. In addition to a fully functional, free 30-day evaluation edition, Password Manager Pro is available as a Free Edition, Standard Edition and Premium Edition. Standard Edition prices start at \$495 per year for two administrators. Premium Edition prices start at \$1,195 per year for five administrators.
