

# ManageEngine Brings Billing to ServiceDesk Plus-MSP

Thursday, November 08, 2012 9:15 AM

Email Print Tweet

ManageEngine, the real-time IT management company, today announced the addition of the Billing module to ServiceDesk Plus-MSP, its complete help desk for managed service providers (MSPs). The new billing functionality lets MSPs enable the managed services business model through accurate billing for multiple accounts from within ServiceDesk Plus-MSP, so MSPs no longer need to juggle multiple tools and manually track and bill for services rendered. A free trial version of the help desk is available at <http://ow.ly/eVItN>.

For MSPs, billing is often a time consuming, manual process that may include third-party invoicing applications, homegrown or custom reporting tools, Excel spreadsheets and/or the help of accountants or bookkeepers. Instead of spending their time solving customers' problems, MSP technicians are forced to spend time updating their reporting apps. The new billing feature automates the entire billing process by helping technicians track time spent, work load and expenses for each request MSPs perform.

"Billing is a critical component of any business, and the ability to track and bill your clients is important in the managed services business model," said Jayakumar Karumbasalam, product manager of ServiceDesk Plus-MSP. "Almost all of our customers generate reports from our software and employ some sort of manual data entry process to bill their clients. Now, ServiceDesk Plus-MSP users can take advantage of the new billing feature to increase their technicians' productivity and eliminate manual processes for generating bills, thereby saving a lot of time and money."

## Billing Built into ServiceDesk Plus-MSP

ServiceDesk Plus-MSP Billing module allows you to:

- Track and bill all services delivered and fixed for each account accurately
- Capture the time spent and work log for each request
- Customize service plan options for each client's business model
- Take advantage of integrated value as all the data is already in the help desk system, which saves unnecessary data entry time
- Receive automatic notifications for renewing contract plans and keeping up to date with your client's account
- Enable and disable billing options upon request
- Get the data the way you want it via the intuitive reporting option, with the integrated value of billing and help desk

ServiceDesk Plus-MSP's billing functionality has been thoughtfully built specifically for MSPs so they can save time, resources, apps and money with this integrated value.

## Pricing and Availability

The new Billing module is available immediately and included as a standard feature, free of charge, in ServiceDesk Plus-MSP 8.1. Prices for ServiceDesk Plus-MSP Standard Edition start at \$595. Download a free trial version of ServiceDesk Plus-MSP at <http://www.manageengine.com/products/service-desk-msp/download.html>.
