AUSTIN, Texas -- (BUSINESS WIRE) -- IT is growing more and more complex, and IT managers need new tools and approaches to ensure optimal response and high quality of service for organizations. Recent high profile outages have shown how important it is to have real-time, end-to-end visibility into the enterprise and service delivery infrastructure. Failure to adopt a real-time approach to IT management can mean huge losses to both share and brand value.

In an upcoming webinar, [ManageEngine](#), makers of a suite of cost-effective, enterprise-grade network, systems, applications, and security management software solutions, will discuss "real-time IT" as the answer to maintaining an optimum end-user experience in the face of increasing IT complexity. By providing a real-time, single-pane-of-glass approach to IT management, real-time IT enables an IT organization to be proactive rather than reactive, empowered to enable the organization, and positioned to play a strategic business role.

In addition to experts from ManageEngine, the webinar will feature research from [Gartner, Inc.](#), culled from the recently-published, free eBook, "[The Evolution of Real-time IT](#)." ManageEngine customer Jimmy Heads, network analyst at SMC³, will discuss how he has been able to increase the productivity of his team by leveraging the benefits of real-time IT.

What: "First Steps to Real-time IT" webinar

Who: Sridhar Iyengar, vice president, product management, ManageEngine
Suvish Viswanathan, research analyst, IT management, ManageEngine
Jimmy Heads, network analyst, SMC³

When: Wednesday, January 25, 2012; 11:30 a.m. Eastern time (8:30 a.m. Pacific time)

How: Register for this free event at <http://ow.ly/8fOVB>

CIOs, IT managers, and other attendees charged with harnessing the power of cloud computing, application availability and performance, virtualization, social and collaboration applications, smart mobile devices, and other technologies transforming IT and business will learn about:

- Real-time IT and ManageEngine
- ManageEngine's approach to real-time IT
- IT360 and how it provides real-time IT visibility
- Real-world success with real-time IT
- Findings from the eBook, "The Evolution of Real-time IT"
