Microsoft 365 **administration made simple with a holistic reporting, management, auditing, and monitoring** solution for all major Microsoft 365 services.

Highlights of M365 Manager Plus

One-stop solution

Provision users, monitor activities, manage devices, automate the functioning of your Microsoft 365 environment, all without having to jump through multiple admin centers or using PowerShell scripts.

Enhanced protection

Utilize real-time alerts, continuous monitoring, and automation polices with triggers to maintain your Microsoft 365 environment's security, no matter the circumstance. Protect product access using in-built MFA methods.

Improved productivity

Reduce the time and effort spent on mundane and day-to-day tasks. Schedule reports, automate tasks, set up periodic backups of your Exchange Online environment, create notification templates to configure and schedule custom emails concerning the activities within your Microsoft 365 services, and more.

Uphold compliance

Prove your compliance with various standards, like SOX, HIPAA, PCI-DSS, GLBA, and more, using exclusive compliance reports.
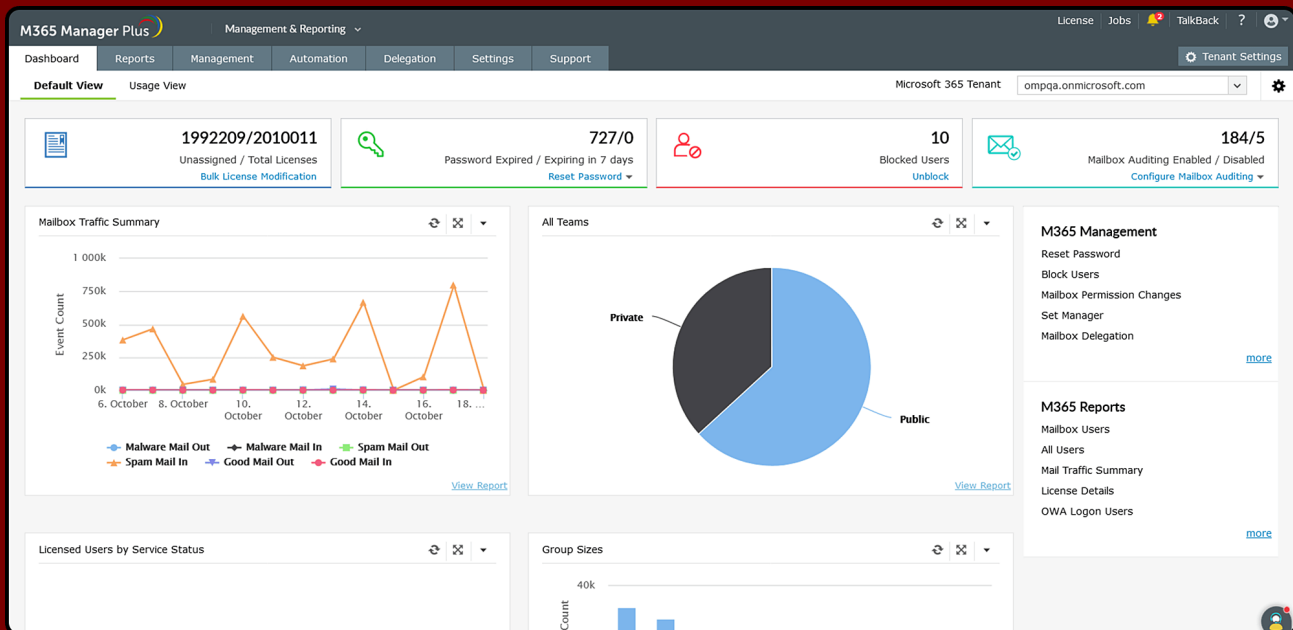

How M365 Manager Plus offers a clear overview of your Microsoft 365 environment

Expansive report generation

Over 700 pre-configured and geolocation-enabled reports on all Microsoft 365 services—all available in just a few clicks.

Real-time auditing

Get real time data on the events happening in your Microsoft 365 environment with customizable audit profiles and real-time alerts.

Prolific management tasks

Powerful and convenient management actions presented in a user-friendly interface to help you execute day-to-day tasks like provisioning Microsoft 365 users, resetting passwords, managing licenses, and more. Maximize your productivity with bulk management capabilities and templates for creation and modification.

Seamless monitoring

Get timely alerts about service outages, the health of your cloud setup, and all other possible user and admin activities, right to your inbox.

Streamlined automation

Schedule individual tasks to be run on objects selected from reports generated, CSV files, or shared locations at certain intervals. Create automation policies to run multiple tasks based on conditions and delays.

Content search

Search through email subjects and bodies in multiple mailboxes, based on multiple conditions, and automate the entire process to take place at set times. Identify emails containing personally identifiable information, phishing attacks, and more, while setting up alerts to keep you informed of these instances in real time.

Granular help desk delegation

Assign limited permissions and access over your Microsoft 365 environment to technicians with virtual tenants and role-based delegation. Create your own roles with customizable combinations of permissions and functionalities at the attribute level, and add technicians for swift assignment of permissions.

Exchange Online backup

Back up your Exchange Online emails, calendar entries, contacts, journals, notes, posts, and tasks, and restore them granularly, with periodic incremental backups.

Hear what our top customers have to say about ManageEngine M365 Manager Plus

Infosys   MICHIGAN STATE UNIVERSITY   accenture   IBM   SIEMENS   Panasonic   COMCAST

❝ M365 Manager Plus is valuable to our future business and, most importantly, it allows me to keep improving the level of service we provide.

Sunstar Suisse SA
IT infrastructure manager

❝ We can now effectively reconcile which licenses we are using in the organization and assign the cost to the business unit. We were also able to identify a number of license changes that could be put in place that reduced our total Microsoft 365 spending.

Timothy Ransom
Group IT/IS manager, The Eclipse Group

Pricing details

M365 Manager Plus offers convenient pricing for enterprises of all sizes. Each M365 Manager Plus license includes one Help Desk Technician license by default.

Note: The pricing given below is for annual licensing only.

> We offer flexible pricing options, so you're not limited to predefined slabs. If your total number of users or mailboxes doesn't match the listed slabs, please contact sales@manageengine.com for a customized quote tailored to your needs.

Number of Users/Mailboxes (with 1 Help Desk Technician)	Standard edition	Professional edition
