# M365 Manager Plus
# Fact Sheet

# Introduction

M365 Manager Plus is an extensive Microsoft 365 administration solution that helps you manage and protect your Exchange Online, Entra ID (formerly Azure AD), Skype for Business, SharePoint Online, OneDrive for Business, Microsoft Teams, and other Microsoft 365 services, all from one place.

M365 Manager Plus provides exhaustive preconfigured reports and helps you perform complex tasks like bulk user management, bulk mailbox management, and secure delegation. You can also automate all the bulk management tasks with custom automation policies to save time. M365 Manager Plus eases compliance management with its built-in compliance reports and offers advanced auditing and security features to keep your Microsoft 365 setup secure against malicious activity.

# Features

### Microsoft 365 reporting

More than 700 pre-configured reports on mailboxes, users, groups, licenses, security settings, and more.

### Microsoft 365 auditing

Monitor events in your Microsoft 365 environment in real time using customizable audit profiles and receive instant alerts.

### Microsoft 365 management

Convenient management actions to help you execute day-to-day tasks like provisioning Microsoft 365 users, resetting passwords, managing licenses, and more.

### Microsoft 365 automation

Automate user account onboarding, stale accounts cleanup, license management, and other essential user and mailbox management tasks effortlessly.

### Microsoft 365 security

Search for emails with personally identifiable information (PII), insider information, and malicious content with automated search schedules to ensure email security and compliance.

### Exchange Online backup

Back up Exchange Online emails, calendar entries, contacts, and tasks with periodic incremental backups, and restore them fully or granularly based on your needs.

### Microsoft 365 monitoring

Monitor end points, as well as service health, with real-time email notification.

### Microsoft 365 alerting

Receive timely alerts regarding service disruptions, the health of your cloud configuration, and any user or admin activities directly in your email inbox.

### Help desk delegation

Empower technicians in your Microsoft 365 environment by assigning specific and restricted permissions through a role-based delegation system using customized roles.

### Password expiration notification

Notify users on their Microsoft 365 account password expiration and allow them to reset passwords instantly.
