

Why spend time manually configuring devices?

Highlights

- Secure storage of configurations
- Informative inventory
- Configuration versioning
- Baseline configuration
- Centralized Control
- Role-based access control
- Real-time change tracking
- Notifications on changes
- Firmware management
- Compliance monitoring
- Automating repetitive tasks
- Detailed audit trails & reports

ManageEngine Network Configuration Manager

If you are a Network Administrator responsible for managing the configurations of network devices from multiple vendors, check yourself:

- Do you spend hours on manually configuring your devices?
- Do you laboriously logon to each device separately to retrieve or change configurations?
- Do frequent configuration changes pose threat to your network availability?
- Do you find it hard to check your configurations for compliance to Government and IT regulations?

If yes, you certainly need NCM!

Automating these NCCM activities with NCM could significantly save your time, cost and resources, reduce the risk of errors and thereby network downtime and improve efficiency and productivity. NCM is a trusted solution to take total control of the entire life cycle of device configuration management. Administrators can leave their NCCM responsibilities to NCM and concentrate on strategic network administration tasks.

Manage Configurations, Take Control of Changes, Ensure Compliance, Automate Tasks

Whatever be your Role, NCM Comes in Handy

IT Managers

- Reduce network outages occurring due to faulty configuration changes
- Ensure configurations comply to IT regulations and standard practices
- Automate config tasks and reduce operation costs

Network Administrators / Engineers

- Maintain versions of configurations in a secure, centralized repository
- Monitor configuration changes in real-time
- Automate time-consuming configuration tasks
- Carry out configuration changes in bulk

Network Security Professionals

- Prevent unauthorized configuration changes
- Keep track of 'who', 'what' and 'when' of changes
- Ensure configurations comply to security policies

"DeviceExpert has helped us save a great deal of time in rolling out configuration changes to numerous network devices within minutes. The automated approach allows us to sleep at night knowing that we always have the most up to date configurations of our devices. DeviceExpert is by far the biggest bang for your buck on the market"

Neil C. Perry, IT Manager, Stoops Freightliner-Quality Trailer, Inc

Installation to Production in just 90 minutes ...

You can install and deploy NCM into production in less than 90 minutes. The process is simple, intuitive and hassle-free. An indicative list of what you can do in less than 90 minutes...

- Discover your devices on a single click and create inventory
- Retrieve configurations from hundreds of devices
- Role-out configuration changes to multiple devices at one go
- Create rules to manage configuration changes
- Examine configurations for compliance to standards
- Automate repetitive tasks

Start getting value for your money in 90 minutes!
