

# ManageEngine

## DDI Central

A unified DNS, DHCP, and IPAM platform delivering resilience, visibility, and control across distributed networks.

DDI Central enables businesses to:

- ✓ Streamline network operations through centralized, automated IP address management.
- ✓ Secure proactively with self-defending DNS firewall policies and layered threat protection.
- ✓ Scale with multi-tenant architecture and granular access controls

## DNS Features

Bulk DNS zone editor tool | Dual-stack full forward and reverse DNS zone management | Dynamic DNS | DNS scavenging | Zone scopes | Query resolution policies | Multi-cloud DNS provider integrations

## DHCP Features

DHCP scope controller | DHCPv6 support | DHCP fingerprinting policies | Static Subnet and lease management | PXE boot templates | DHCP reservations | DHCP failover

## DNS Security Features

Threat intelligence | DNS detection and response | DNS and DHCP anomaly detection | DNSSEC with TSIG | DNS Firewall | Response Policy Zones | Response rate limiting policies | Response policy zones | Access control lists | DNS over TLS (DoT)/DNS over HTTPS (DoH) | Domain views

## IPAM Features

Dual stack IP inventory management | IP lease history insights | IP-DNS-MAC identity mapping | IP-Device diagnostics | IP-Device risk insights

## Login authentication

SAML authentication | LDAP authentication | Two-factor authentication

# Why choose DDI Central for your network infrastructure?

- ✔ **DNS–DHCP service provider:** Deploys built-in DNS/DHCP on any Linux server—no hardware needed.
- ✔ **Multitenant architecture:** Manages distributed sites and overlapping IP spaces without conflicts.
- ✔ **Efficient multi-cloud observability** for hybrid infrastructures
- ✔ **Pared back navigation** with a straightforward UI
- ✔ **Large scale remote site visibility and control**
- ✔ **Centralized DNS, DHCP, and IP address management**
- ✔ **Advanced DNS, DHCP, and IP discovery**
- ✔ **Policy based IPv4 and IPv6 assignments**
- ✔ **Scheduled DNS and DHCP configurations**
- ✔ **Smart administration of static or delegated scopes**
- ✔ **Advanced scope monitoring**
- ✔ **Plug-and-play onboarding** with automated PXE boot provisioning
- ✔ **Built-in failover and auditing**
- ✔ **Role-based access control and REST APIs**
- ✔ **Comprehensive reports and analytic**

## Integrations

# ManageEngine

## DDI Central

Take centralized control over your  
distributed network infrastructure with
