

# ManageEngine ADAudit Plus

## Product Features and Highlights

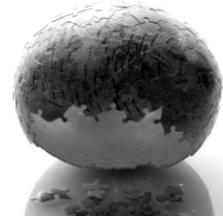

# Scenario Today...

- Worldwide.. Microsoft is the dominant infrastructure, AD is the dominant directory service
- Active Directory by itself has very limited management capabilities, lacks enterprise-class management
- There is a need to Audit all actions done in the Active Directory and Comply with security standards Regulatory Requirements like SOX, HIPAA, GLBA etc.,
- Administrators resort to tedious manual methods - command line tools & scripts to achieve the above yet find the cost of support tickets on the rise.

# ManageEngine ADAudit Plus

ManageEngine ADAudit Plus is a Web Based Active Directory Change Auditing and Reporting solution.

It helps IT Administrators to audit and track all changes in Windows Active Directory.

Active Directory changes on Users, Computers, Groups, Domain Policies and logon activities are audited and reported from a central web console.

# What problems does ADAudit Plus solve?

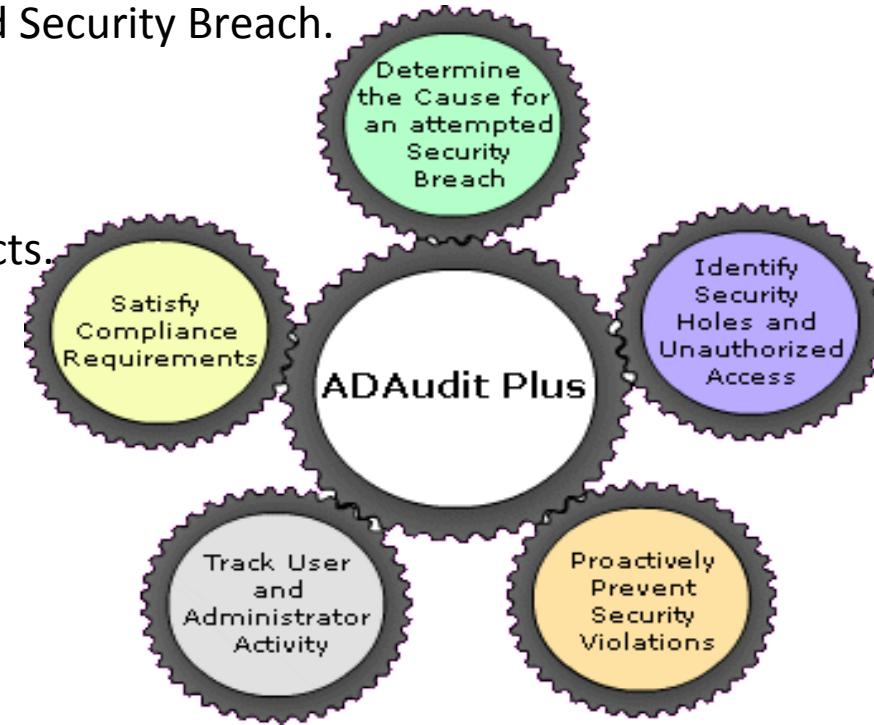

Helps Determine the Cause for an attempted Security Breach.

Identify Security Holes and Unauthorized Access on User Accounts and other AD Objects.

Pro-actively Prevent Security Violations.

Track User and Administrator Activity.

Satisfy Audit and Regulatory Compliance Requirements like SOX, HIPAA, GLBA etc.,
