Reports

Automate Report Generation and have it right in your inbox. 150+ Pre-Configured Reports I 50+ Search Attributes I Scheduled Email reports I Browser-Based.

Alerts

Real-Time On-screen Alerts and instant emailing of Alerts to your inbox! Email Notification I Web Based I In-Depth Event Analysis

Filter based reports

Monitor Active Directory / File Server / Member Server changes with comprehensive graphical display reports. Audit Users, Computers, Groups, GPO's, OU's and Domain policy changes.

Member Server

Track the Logon/Logoff on a Member Server. Schedule to track events like RADIUS Logon, Terminal Services Activity, Logon Duration and Logon History.

Failover Cluster Auditing

Audit Windows File Server Failover Clusters for a downtime-free network environment. Unique Profile Based Reports categorized based on File, Server and User Audit Reports.

File Server

Track file creation/modification/deletion from authorized / unauthorized accesses, with detailed forensics of document changes to files and folder structure, shares and permissions.

Web based

Audit your Server Environment from anywhere, anytime with the web-based application. Providing a comprehensive Dashboard view, aiding you to be on top of things and be alerted of issues with instant email alerts and reports.

Active Directory

Administrators can Track Logon/Logoff and Audit User Management Actions, assign help-desk tasks to track and monitor account changes in the domain with reports and alerts.

Centrally operated

Manage the Network Server environment from a central location, easing access - modification tracking, auditing and reporting.

Group of users

Monitoring user management actions and maintaining a record of actions done by users, administrators and technicians will help in efficient functioning of an organization.

Ease of use

The easy-to-comprehend comprehensive reports and alerts helps answer the four vital Ws of Active Directory auditing: "Who" did "What" action, "When" and from "Where"! Also, export the results to xls, html, pdf and csv formats for analysis

Admin

Administrator can audit, monitor and with the pre-configured reports and instant email alerts, ensure a secure Windows Server environment.

Real time

The Real-time email alerts and schedulable reports help you to take instant preventive steps in time of unauthorized access / modification.

Logon Tracking

Monitor every user logon/logoff and know everyday user actions with reports of every success / failure logon event across servers in the network.

Data archiving

Audit data is automatically saved as zip formats in a single in-built database, saving on space. Restore Archived Events for reporting, compliance and forensic analysis.

Compliance

Meet SOX, HIPAA, GLBA and FISMA standards with comprehensive detailed graphical reports.

ManageEngine ADAudit plus

Windows Active Directory Auditing

For security reasons critical resources in the network like the Domain Controllers, access rights are crucial, ADAudit Plus lists the entire information on users who have last logged on / logged off or have attempted to breach critical resources in the domain. Track user, GPO, Computer, OU changes with 150+ detailed event specific reports and instant email alerts.

Highlights

- ☐ Track users Logon / Logoff, GPO, OU and Audit User Management Actions.
- ☐ View user object life cycle changes - creation, modification and deletion.
- ☐ Export the reports to desired formats xls, csv, pdf and html.
- ☐ View reports specific to any / every Active Directory change.
- ☐ Admin can assign helpdesk tasks to track and monitor account changes in the domain with reports and alerts.

Windows File Server Auditing

Securely track the authorized / unauthorized access, changes to the documents in their files and folder structure, shares and permissions. The cost of Securing, Segmenting and meeting Compliance makes for a resource intensive administrative task! Simplify & Save with Windows File Server Auditing.

Highlights

- ☐ Detailed Forensics of Approved, Unapproved Changes in file & folder structure.
- ☐ Audit Windows File Server permission changes to System Access Control list.
- ☐ Track Windows File server Modifications & Access Permissions.
- ☐ Intelligent Reporting- Automated Scheduled Reports and Instant Alerts.
- ☐ Audit Windows File Server Failover Clusters for a secure, downtime-free and a compliant network environment.

Windows Member Server Auditing

Member servers are the (print, web, application, and communication) workhorses of any Microsoft Server environment. Track server logons, Schedule event collection and track the various audit-process related actions. Audit the Remote Authentication Dial-In User Service (RADIUS) network access by user logged on remote computer.

Highlights

- ☐ Track Logon/Logoff on a Member Server.
- ☐ Logon Duration, Logon History and Terminal Services Activity.
- ☐ Monitor audit related actions with Process tracking.
- ☐ Scheduled jobs tracking helps you to track all scheduled jobs.
- ☐ Monitor RADIUS Logon Failures and History (NPS) authentications.
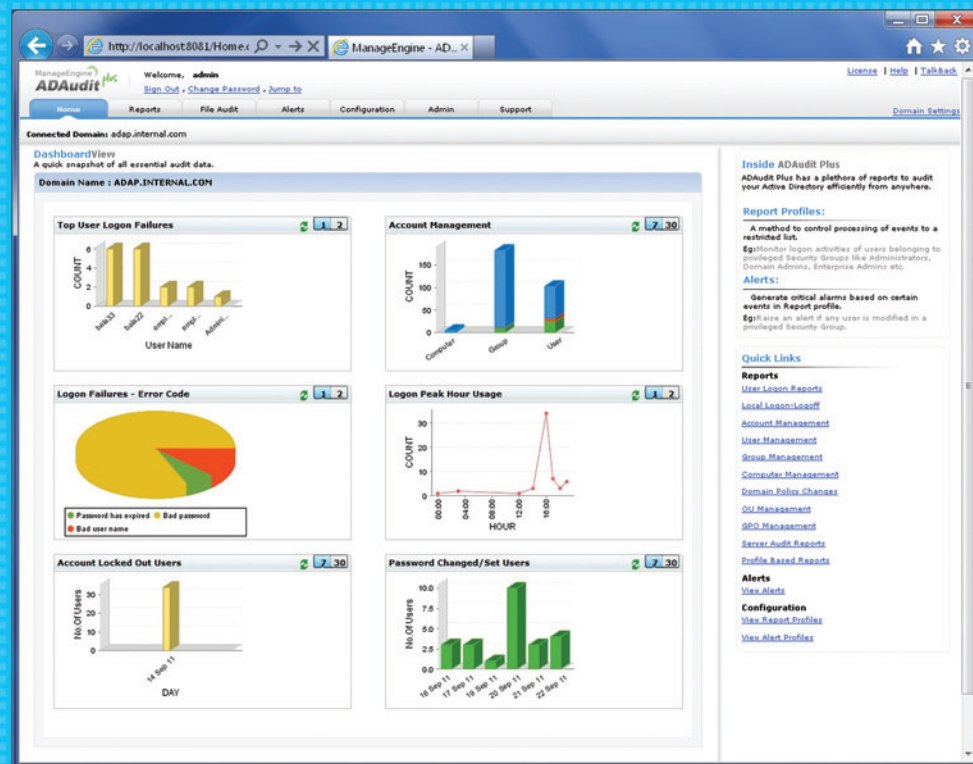

Auditing with ADAudit Plus

Address the most-needed security, audit and compliance demands; View comprehensive reports on administrative changes and logon events in the Active Directory, File Server and Member Servers. Arm yourself with easily comprehendible thorough 150+ pre-configured reports and instant alerts. Find answers to the vital 4W's - Who effected what change in Active Directory, when and from where. Archive change records for better forensic analysis. Also, export the results to xls, html, pdf and csv formats to assist in interpretation and computer forensics.

Highlights

- In Real-time, centralized web based audit of your Windows Servers environments.
- Audit Active Directory, File Server and Member Servers in Windows Server environment.
- Determine the cause for an attempted security breach.
- Identify security loop holes and unauthorized access.
- Track user logon/logoff and administrator's administrative activities.
- Satisfy compliance requirements like SOX, HIPAA, GLBA etc.,
- Archive change records for better forensic analysis.

Audit, Monitor & Be Compliant with ADAudit Plus

"ManageEngine ADAudit Plus reports helped us to effortlessly formulate our monthly management reports. Among the many features, creating email alerts for group policy changes, and OU creations/deletions have been most helpful."

- Thomas J. Fraser, Acument™ Global Technologies, Inc.

"We finalized on ManageEngine ADAudit Plus, primarily for our SOX Audit reports, with its easy to comprehend output is very cool and the highly competitive pricing helped grab our attention."

- Andreas Ederer, Cosma International.
