

# Get complete visibility across changes in Active Directory and Windows servers.

ADAudit Plus offers real-time monitoring, user and entity behavior analytics, and change audit reports that help you keep your AD and IT infrastructure secure and compliant.

- Track all changes to Windows AD objects including users, groups, computers, GPOs, and OUs.
- Achieve hybrid AD monitoring with a single, correlated view of all the activities happening across both on-premises AD and Azure AD.
- Monitor every user's logon and logoff activity, including every successful and failed logon attempt across network workstations.
- Audit Windows file servers, failover clusters, NetApp, and EMC storage to document changes to files and folders.
- Monitor system configurations, program files, and folder changes to ensure file integrity.
- Track changes across Windows servers, printers, and USB devices with a summary of events.
- Leverage advanced statistical analysis and machine learning techniques to detect anomalous behavior and defend against cyber attacks.

## The challenge

Active Directory is the cornerstone of an increasing number of business functionalities and is also a gateway to an organization's information. But the lack of simplicity and a centralized storage system, primitive monitoring and alerting functionalities, and limits on the amount of log storage leaves IT administrators in a fix.

## The solution

A robust IT security and compliance solution, ADAudit Plus, designed for Windows-based organizations provides in-depth knowledge about changes effected to both the content and configuration of Active Directory and servers. Additionally, it provides thorough access intelligence for desktops and file access in servers (including NetApp filers), enabling you to protect organization data.

“ No other software works as effectively or easy as ADAudit Plus. None were as simple as to install and jump right in to start using. All audit requirements from HIPAA are covered in ADAudit Plus. We have passed an in-depth PEN audit test and several industry-related security audits because we are using ADAudit Plus. It's extremely simple and cost-effective. ”

– Renee Davis  
CIO, Life Management Centre, Florida.

# ADAudit Plus - A unified auditing solution for:

## Hybrid Active Directory

- Get a correlated view across on-premises and Azure AD
- Utilize over 200 detailed, event-specific GUI reports.
- Monitor, report, and alert on domain controllers in real time.
- Track changes to Group Policy and all AD objects.

## File Servers

- Track file creation, modification, and deletion.
- Audit file access.
- Get forensics on security and permission changes.
- Monitor network shares.

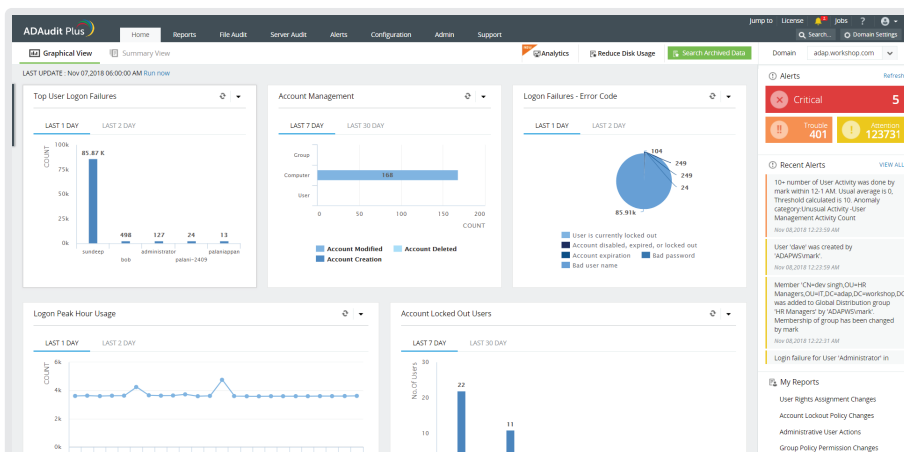

## Workstations

- Track logons and logoffs to workstations.
- Monitor activity on terminal services.
- View and schedule graphical reports.
- Report on employee attendance, total active and idle time.

## Windows Servers

- Utilize file integrity monitoring (FIM).
- Monitor RADIUS logons.
- Audit removable storage devices.
- Audit print servers.

Also monitor, alert and report on AD FS, AD LDS, LAPS, DNS, NAS devices, scheduled tasks and processes, Windows security log and other system events.

## Highlights

- Dedicated privileged user activity monitoring.
- Account lockout analyzer.
- User behavior analytics (UBA).
- Automated threat response system.
- Tailor-made reports to meet compliance standards.
- Top-notch search and parse capabilities.
- Seamless SIEM integration.
