

Case Study

# ADAudit Plus' User Behavior Analytics helped INSPIRE Korea detect and mitigate possible insider attacks.

Company:  
INSPIRE Entertainment Resort

Industry:  
Hospitality

Location:  
Korea

## About INSPIRE Entertainment Resort

INSPIRE Entertainment Resort in South Korea aspires to provide fresh and exhilarating experiences to its customers. Located just 15 minutes away from the Incheon International Airport, INSPIRE is the ideal destination for both domestic and international guests traveling to explore the metropolitan city. Mohegan, the visionary parent company of the resort, has helped it incorporate inspirational designs to offer a top-tier comfort experience with the thrill of exciting activities.

## Business challenge

INSPIRE found itself exposed to cyber risks within the organization. It was especially concerned about the abnormal activities of its own users. To add to this, INSPIRE faced challenges in auditing its network and generating reports for its compliance requirements. It eventually realized that with the help of a comprehensive auditing tool, all of these requirements would be easily solved.

Chang Geun Kim, cybersecurity analyst at INSPIRE, introduced ManageEngine ADAudit Plus, a real-time change auditing and user behavior analytics (UBA) solution, to his team of analysts. ADAudit Plus was already being used in Mohegan, which holds seven top-tier resorts all over the world, raising the team's trust and expectations a step higher.

*In our line of business, we are inclined to face cyber risks within. Our primary business requirements were simple: Perform granular audits across our environment, look out for abnormal user activities, and, of course, solve compliance requirements.*

**Chang Geun Kim**

Cybersecurity analyst, INSPIRE

## ADAudit Plus: The auditing tool that inspired INSPIRE

INSPIRE was right about choosing ADAudit Plus. With its preconfigured reports for auditing file servers, member servers, and workstations, ADAudit Plus solved all of the company's auditing requirements. The tool offers curated reports to help INSPIRE stay compliant with PCI DSS and GDPR mandates.

The possibility of devastating insider attacks was also addressed by ADAudit Plus' UBA capabilities, establishing a behavior baseline for every user in the environment and identifying anomalous activities (and, more importantly, suspicious activities). For example, if a user who otherwise logs in during regular work hours all of a sudden logs in at 3am, this will be recorded in the Unusual Logon Activity Time report.

INSPIRE was also impressed by the Attack Surface Analyzer. This prominent feature provides over 25 exclusive reports to help INSPIRE detect attacks, such as pass-the-hash, Kerberoasting, and brute-force attacks, and identify risky configurations in cloud environments.

*"Our highly recommended auditing solution: Its user management reports and the UBA feature gave us crucial insights about every user in our environment. ADAudit Plus has helped us save money and, more importantly, our precious time." —Chang Geun Kim, cybersecurity analyst, INSPIRE.*

## | OnboardPro: Unlocking the full potential of ADAudit Plus for INSPIRE

INSPIRE knew ADAudit Plus' potential but required a little expertise to make the best out of the auditing solution. OnboardPro, ManageEngine's professional implementation service, provided that exact expertise. ManageEngine's product implementation experts scheduled regular calls with INSPIRE's cybersecurity analysts, assisted in the installation, and customized ADAudit Plus to the company's AD environment.

INSPIRE wanted to audit and be notified of all user account creations. ManageEngine's implementation experts created a custom report for event logs generated when a user is created, solving the company's unique auditing requirement. Additionally, the implementation experts configured a custom alert to be triggered when an account creation event log is generated.

*"OnboardPro and their implementation team were real quick and thorough, from responding to our concerns to setting up ADAudit Plus for us. One word to describe our experience with OnboardPro: perfect!"* —**Chang Geun Kim**, cybersecurity analyst, INSPIRE.

## | About OnboardPro

[OnboardPro](#) is a ManageEngine service that provides solution implementation to clients upon request. This service includes the installation and customized configuration of ManageEngine solutions. It enables clients to seamlessly begin work without worrying about the complexities of installation, deployment, and product use. Every client environment is unique and requires additional support beyond basic installation and standard features. With our onboarding support, clients have the option to engage a team of product experts to manage installation, implementation, customization, and training based on their business needs.
