

CASE STUDY

ADAudit Plus makes file auditing easier, more efficient for Crunch

Company:
Crunch

Industry:
Finance

Location:
United Kingdom

“

Due to the simplicity and detail provided by ADAudit Plus, we now have a fully audited file system that accesses the data we need, when we need it,”

Mohsin Malique,
IT Administrator, Crunch

About Crunch

Crunch is an online accounting service based in the UK that designs and supports online accounting software for small businesses, startups, freelancers, and contractors. Crunch software enables users to send invoices, record expenses, and receive a real-time view of clients' accounts. Crunch also provides expert advice and unlimited accountancy support for users; plus it offers access to its free, online community for businesspeople, Crunch Chorus.

The Business Challenge

With client financial data housed in its file servers, Mohsin Malique, the IT Administrator at Crunch, found it difficult to track the high volume of file activity as well as user accesses and modifications. Malique selected ADAudit Plus to address Crunch's auditing software requirements.

ADAudit Plus Streamlines File Server Management

Malique immediately found auditing file servers with ADAudit Plus made his job easier. ADAudit Plus generates [easy to read reports that detail](#) who accesses the servers—including permission changes and failed access attempts—as well as what changes were made to the files and where the files originated.

In use for almost two years at Crunch, ADAudit Plus has ensured a simpler file server management strategy.

ManageEngine ADAudit Plus

ManageEngine ADAudit Plus is a real-time Active Directory change auditing solution that features file and folder monitoring, plus access and permission change capabilities. With more than 200 event-specific reports and real-time email alerts, it provides in-depth knowledge about changes made to both the content and configurations of Active Directory, Azure AD, and Windows servers. Additionally, ADAudit Plus provides thorough insight on workstation and file server access (including NetApp and EMC). For more information about ADAudit Plus, visit manageengine.com/active-directory-audit.
