

# Motus UK finds the key to better auditing with ADAudit Plus

With the help of ADAudit Plus, Motus UK gains control over their Active Directory environment, by tracking every change made in their domain with detailed reports on the who's, when's and where's.

Organization: **Motus UK**

Industry: **Vehicle dealership**

Location: **UK**

## About the Organization

Motus UK is one of the largest commercial vehicle dealerships in England. It's a highly competitive and profitable vehicle group focused on providing value for its customers. As a distributor and retailer of vehicles and related products and services, Motus UK provides an integrated offering of services across all segments of the vehicle value chain for a broad range of the world's most respected vehicle brands.

Prior to ManageEngine we did not have a tool to audit our domain but thanks to their robust tool – ADAudit Plus, we can now audit every single change made in our AD.

**Jigar Mehta,**  
IT Infrastructure engineer.

## Business challenge

Jigar Mehta, an IT Infrastructure engineer at Motus UK, found it hard to cope with the growing demands and challenges of keeping his IT environment safe and secure. With an ever-growing business spanning across 80 cities in the UK, Motus UK's IT infrastructure is bound to be robust. For such a widespread business, accountability is crucial. However, with the native auditing tools, it's nearly impossible to ensure complete visibility into every event occurring across the entire setup. Mehta found it was difficult to track the changes made in his domains across the various sites. So, he started looking for a reliable tool that could effectively audit the entire domain.

## ADAudit Plus fits the bill

Thanks to ADAudit Plus, Mehta is now able to easily keep track of every change made in his domain—a dream come true for any IT admin. With in-depth reports, real-time alerts, and graphical displays, ADAudit Plus collects all the modifications made and groups them together by category. This way, Mehta no longer has to sift through the event viewer, overwhelmed by the sheer volume of information. Mehta is glad the nightmare is over, and says, **"Thanks to their robust tool—ADAudit Plus—we can now audit every single change made in our AD".**

ADAudit Plus doesn't miss any anomalies. On top of that, it sends alerts the moment something suspicious takes place, which puts Mehta at ease. He says, **"Knowing that we now have the ability to audit our AD gives us peace of mind and ensures accountability."**

Mehta places his faith in ADAudit Plus, confident that it will take care of all the hard work. He goes on to say, **"ADAudit Plus makes the life of IT professionals easy in terms of overall management of IT infrastructure."**

# Key Features of ADAudit Plus

Some of the other important features that make ADAudit Plus a crucial tool for enterprises are:

## Real-Time Change Monitoring and Alerting

Enable 24/7 surveillance for AD, Azure AD, Windows servers, file servers, and workstations.

## Trace User Footsteps

Gain insight into user logon activity occurring across your Windows server environment, spanning from logon failures to logon history.

## Troubleshoot Account Lockouts

Detect lockouts instantly with real-time alerts and analyze the root cause for these lockouts with in-depth reports.

## Protect Sensitive Data

Track file access across Windows file servers, failover clusters, NetApp, and EMC.

## Actively Respond to Threats

Leverage threshold-based alerts and statistical analytics to detect anomalies instantly. Configure the tool to act automatically in the event of an attack.

## ManageEngine ADAudit Plus

ManageEngine ADAudit Plus is an IT security and compliance solution. With over 200 event-specific reports and real-time email alerts, it provides in-depth knowledge about changes made to both the content and configurations of Active Directory, Azure AD, and Windows servers. Additionally, ADAudit Plus provides thorough insight on workstation and file server access (including NetApp and EMC).
