Business Needs

The foremost need of Cosma International in wanting an audit product was to aid prepare SOX Audit Reports of their 280+ users and 250+ computers; this said the elementary block was breaking down the humongous assorted data into comprehensible SOX Audit compliance reports.

Solution

ADAudit Plus scores not only on the functionality of gathering assorted Active Directory data, but also in interpreting them as simple reports. It likewise excels in monitoring the Active Directory data and furthermore pinpointing security breaches.

A brief input on SOX Audit Compliance for Public Limited Companies:

The Sarbanes-Oxley Act (SOX) of 2002 set new requirements for the integrity of the source data related to financial transactions and reporting, stored within corporate databases including: user management, authentication, separation of duties, access control, and audit trail.

The iterative compliance process includes the following four steps:

Assess - Gather risk and data usage information.

Set Controls and Policies - Define acceptable usage pattern.

Monitor and Enforce - Capture activity and prevent unauthorized actions.

Measure - Report on activity, recommend refinements as needed..

Benefits

ManageEngine ADAudit Plus with its complete audit reporting features helped Cosma International primordially in preparing the SOX Audit compliance reports and to manage data. ADAudit Plus is simple to deploy, easy to manage and reasonably priced making it a valuable asset for any company.
