

ADManager Plus for Education

Empowering educational institutions
with seamless identity management

Identity management in schools and universities: Why it matters

Modern education relies on seamless digital experiences where identity management serves as the backbone of:

Online learning platforms

Administrative systems

Research collaboration tools

Campus-wide network access

The challenges facing your education IT team

Compliance pressure

FERPA, GDPR, and institutional policies demand audit trails and access controls, but manual processes make this risky and costly.

Seasonal user avalanche

Every enrollment period, IT scrambles to provision thousands of accounts — bottlenecks and frustrated students on day one.

"Who gets access to what?" chaos:

Managing permissions across students, faculty, adjuncts, contractors, and guests creates inconsistent access rights and security blind spots.

The challenges facing your education IT team

Resource constraints

Limited IT staff and budgets mean support tickets pile up while the team struggles to keep up.

System silos everywhere

LMS, SIS, library, and research tools operating independently create data silos and user friction across the campus.

Your solution

ADManager Plus for education

Empowering educational institutions with
seamless identity management

From enrollment to access: Onboarding done right

Automated onboarding

Process hundreds of new student accounts simultaneously using standardized templates for different user types.

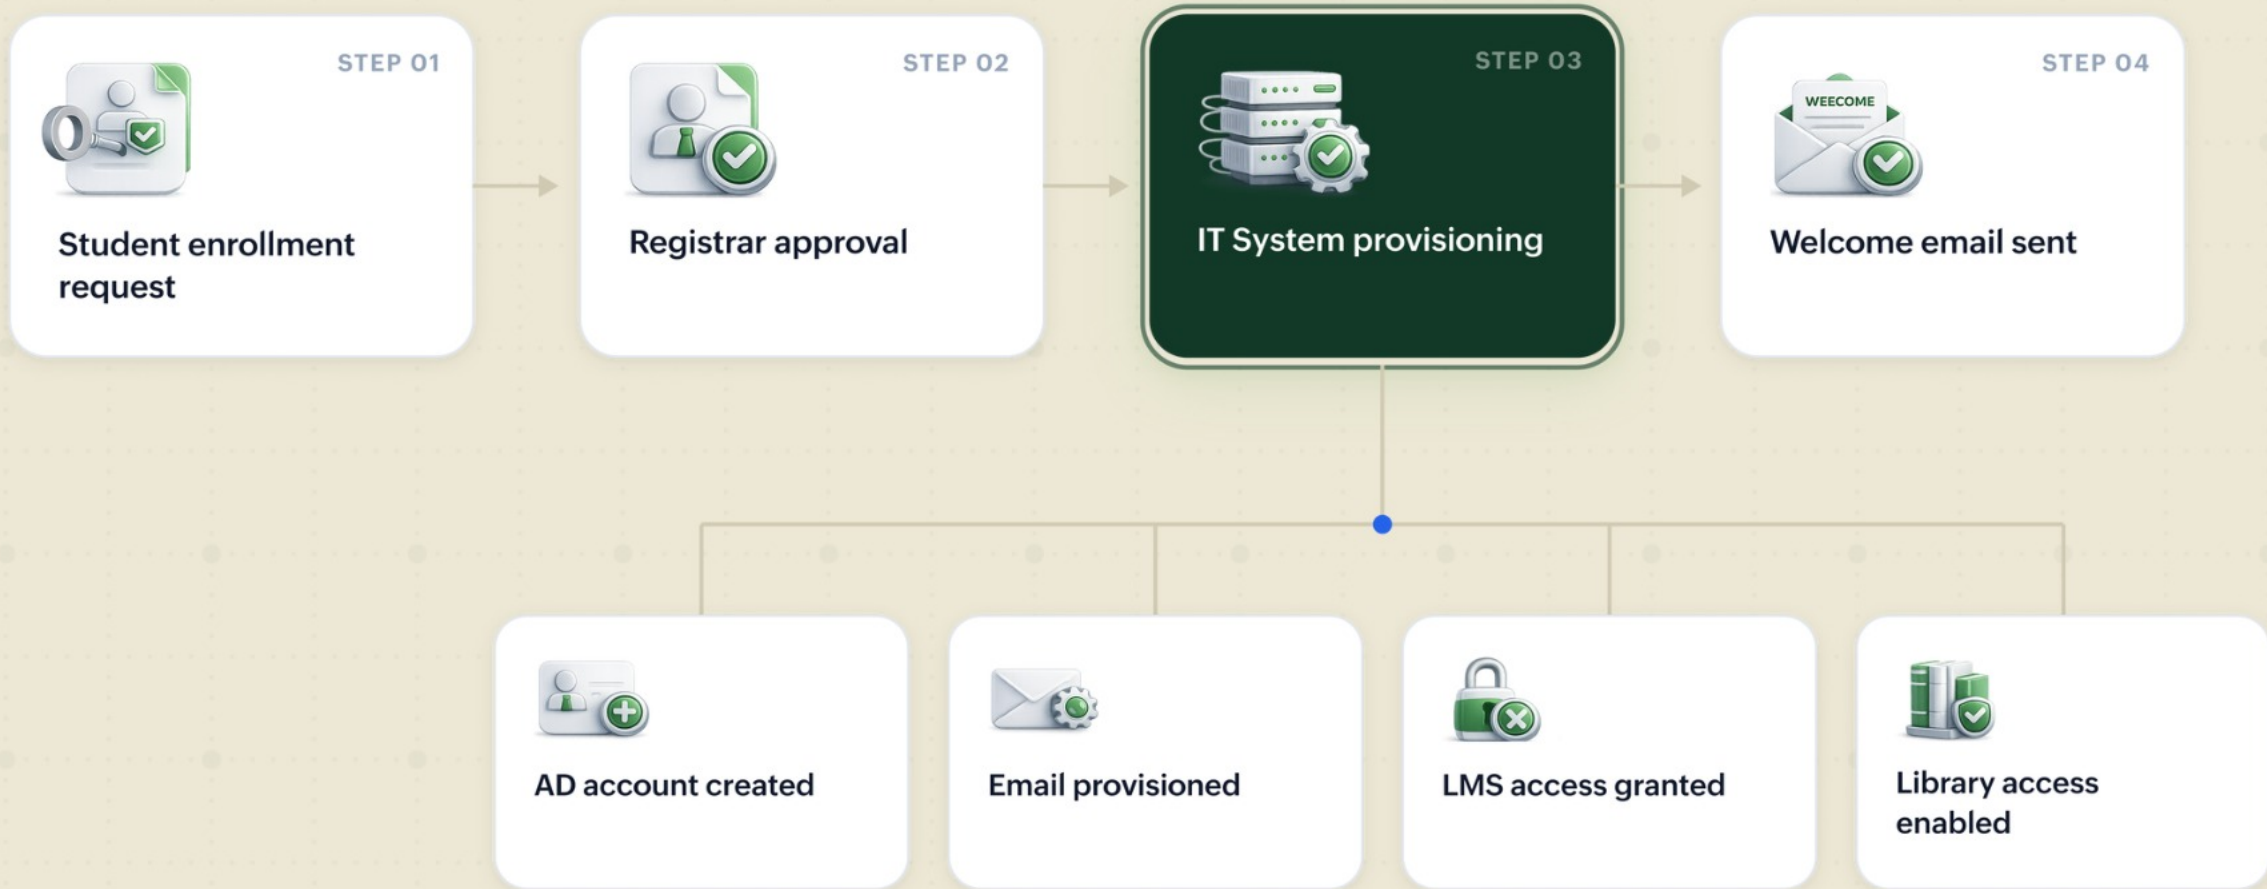

Life cycle management

Automatic account creation, modification, deactivation, and bulk updates for every semester transition.

SIS integrations

Seamless integration with student information systems — easily import and sync user data at scale.

Governed access for faculty, staff, and students

Approval workflows

Automated hierarchical approvals with gates for sensitive account modifications.

Access requests

Role-based request submission with built-in approval routing.

Governed access for faculty, staff, and students

Faculty access request

(Research database)

Department head approval

Research compliance review

Time-Limited access granted

Auto revocation at project end

Campus-wide control without compromising security

Role-Based administration

Empower department admins with limited privileges.

Audit trails

Complete logging for compliance requirements.

Password management

Reset passwords in bulk and track expiration campus-wide.

Central IT admin
(Full AD access. Set policies and templates)

School of business admin

Can manage:

- Business students
- Business faculty
- Department groups

School of engineering admin

Can manage:

- Engineering students
- Engineering faculty
- Lab access groups

HR department admin

Can manage:

- Staff accounts
- Employee onboarding
- Offboarding

Help desk staff

Can manage:

- Password resets
- Account unlocks
- Basic user lookups

Cannot access or modify

- Other departments
- System policies
- Admin account

Stay FERPA-compliant with comprehensive reporting

Compliance reports

Ready-made, detailed reports for audits to meet compliance standards like FERPA.

Access reviews

Periodic reviews to validate user permissions and ensure least-privilege compliance.

Risk and anomaly detection

Identify over-privileged accounts, visualize attack paths, and flag unusual admin activity.

Tooltip 1

Export the report in your required format.

Tooltip 2

Schedule the reports to be generated and shared with administrators and stakeholders automatically.

Tooltip 3

Take management actions straight from the report.

USE CASE 1

New student onboarding

Scenario

Fall semester enrollment.

Challenge

University needs to onboard 5,000 new students in three weeks.

ADManager Plus solution

Bulk import

Import student data from SIS via integration.

Pre-defined templates

Use templates while creating user accounts to maintain consistency.

Automated provisioning

Create AD accounts, assign licenses, add to groups, set up mailboxes, and more.

Password configuration

Set up passwords and password policies for new users.

USE CASE 1

Results — New student onboarding

Key features used

- ✓ Bulk user creation
- ✓ Template-based provisioning
- ✓ Password configuration

Time saved

Significant reduction in manual processing.

Consistency

Standardized account setup across all departments.

User experience

Immediate access to all required systems.

IT efficiency

Staff can focus on strategic initiatives.

USE CASE 2

Faculty life cycle management

Scenario

Managing faculty throughout the academic year.

Challenge

Faculty members have complex roles, temporary appointments, and research collaborations.

ADManager Plus solution

Role-based templates

Different templates for professors, adjuncts, and visiting faculty.

Delegation

Department heads can manage their faculty.

Automated workflows

Approval processes for special access requests.

Scheduled tasks

Automatic account updates for contract renewals.

USE CASE 2

Results — Faculty life cycle management

Key features used

- ✓ User templates
- ✓ Help desk delegation
- ✓ Workflow automation
- ✓ Scheduled tasks

Security

Proper access controls based on employment status.

Compliance

Audit trail for all access changes.

Efficiency

Reduced administrative burden on HR and IT.

Flexibility

Easy management of temporary and visiting faculty.

USE CASE 3

Research project access management

Scenario

Managing access to research resources.

Challenge

Research teams need temporary access to specialized systems and data.

ADManager Plus solution

Project-based groups

Create security groups for research projects.

Time-limited access

Automatically revoke access when projects end.

Approval workflows

Research directors approve access requests.

Audit compliance

Track who accessed what research data.

USE CASE 3

Results — Research project access management

Key features used

- ✓ Group management
- ✓ Time-based access controls
- ✓ Approval workflows
- ✓ Comprehensive reporting

Security

Controlled access to sensitive research data.

Compliance

Meet institutional and grant requirements.

Collaboration

Easy team formation and resource sharing.

Automation

Reduced manual oversight of project access.

Case study 1

APEC University

Location

Santo Domingo, Dominican Republic

Type

Private university founded in 1965

Challenge

Bulk modification of user accounts required manual modification of each user, which was a tedious process. Creating user templates from scratch was time-consuming.

THE CHALLENGE

APEC University faced significant challenges in bulk modification of user accounts. It had to modify each user manually, which was a tedious process.

Case study 1

ADManager Plus solution

Integration

Seamless integration with the help desk tool.

User templates

Predefined templates for customizing user details during onboarding.

Scalable user operations

Create, modify, and manage users at scale.

Life cycle management

Automated user onboarding and offboarding.

Results

- ✓ **Time savings**
These templates saved significant time and effort for the educational institution.
- ✓ **Efficiency**
Streamlined user management processes.
- ✓ **Standardization**
Consistent user provisioning across the university.

Case study 1

APEC University

Key testimonial

"These templates saved significant time and effort for the educational institution."

Ricardo Pérez,

IT general director

Case study 2

Mansfield Independent School District

Location

USA (Texas)

Size

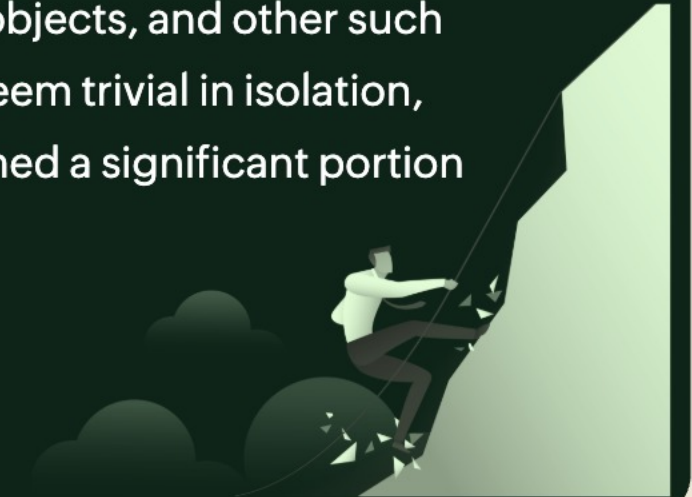

Over 30,000 students and 4,000 staff members spread across 22

Challenge

The IT team is constantly bogged down with routine tasks using Microsoft's built-in tools.

THE CHALLENGE

The district's reliance on Microsoft's built-in tools meant that the IT team was constantly bogged down with routine tasks. Resetting passwords, moving objects, and other such tasks, which might seem trivial in isolation, cumulatively consumed a significant portion of their workday.

Case study 2

ADManager Plus solution

Task delegation

Distributed responsibilities efficiently across the IT team.

Scheduled reports

Comprehensive monitoring and reporting system.

Automated workflows

Streamlined routine tasks.

Risk management

Proactive identification of over-privileged accounts and risk indicators.

Results

- ✓ **Time management**
Routine tasks that previously consumed hours were now handled swiftly, freeing
- ✓ **Security enhancement**
Potential security threats were identified
- ✓ **Operational efficiency**
Significant improvements in overall IT operations by reducing time and manual

Case study 2

**Mansfield
Independent
School District**
Key testimonial

"ADManager Plus has been a game changer for us. The time we've saved and the improvements in our cybersecurity posture are evident."

Kim Pollard,

Network administrator

Case study 3

Bishop Alemany High School

Location

Mission Hills, California, USA

Size

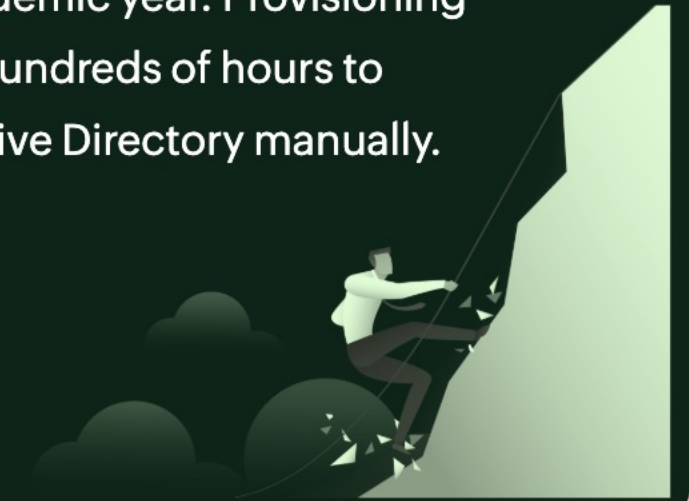

Co-educational high school (501-1,000 users)

Challenge

Provisioning new users required hundreds of hours to manually enter details into Active Directory, as well as create new user accounts, assign users to the correct OUs, generate random passwords, and other tasks.

THE CHALLENGE

IT department operations at Bishop Alemany High School were significantly impacted at the start of each academic year. Provisioning new users required hundreds of hours to enter details into Active Directory manually.

Case study 3

ADManager Plus solution

Automation

Streamlined user provisioning and deprovisioning process.

User templates

Standardized process for creating new users.

Notification templates

Automated email distribution to students and parents.

Stale account cleanup

Automated account maintenance without requiring any manual steps.

Results

- ✓ **Time savings**
Elimination of hundreds of hours of manual work.
- ✓ **Standardization**
Consistent user creation processes.
- ✓ **Automation**
Reduced manual effort in user life cycle management.
- ✓ **Improved communication**
Automated notifications to stakeholders.

Case study 3

Bishop Alemany High School

Key testimonial

"The IT department was in dire need of a solution that could automate the institution's user life cycle management so they could eliminate the troubles of manual provisioning."

Arjang Hosseini,

Director of IT

Why leading educational institutions choose ADManager Plus

Operational excellence

- ✓ **Dramatically faster** user onboarding
- ✓ **Significant reduction** in manual processes
- ✓ **Substantial improvement** in user satisfaction

Security & Compliance

- ✓ **Complete audit compliance** with FERPA and institutional policies.
- ✓ **Elimination of orphaned accounts** through automated life cycle management.
- ✓ **Comprehensive audit trails** for all identity operations.

Why leading educational institutions choose ADManager Plus

Cost efficiency

- ✓ **Reduced IT overhead** significantly.
- ✓ **Eliminated manual errors** and associated costs.
- ✓ **Improved resource allocation** for strategic initiatives.

Scalability and flexibility

- ✓ **Handles seasonal spikes** in user creation.
- ✓ **Adapts to organizational changes** seamlessly.
- ✓ **Supports growth** from hundreds to thousands of users.
