

RANSOMWARE

SO FAR & BEYOND

This has been around for a while. **Why is it a concern now?**

62% increase of incidents just in the United States.

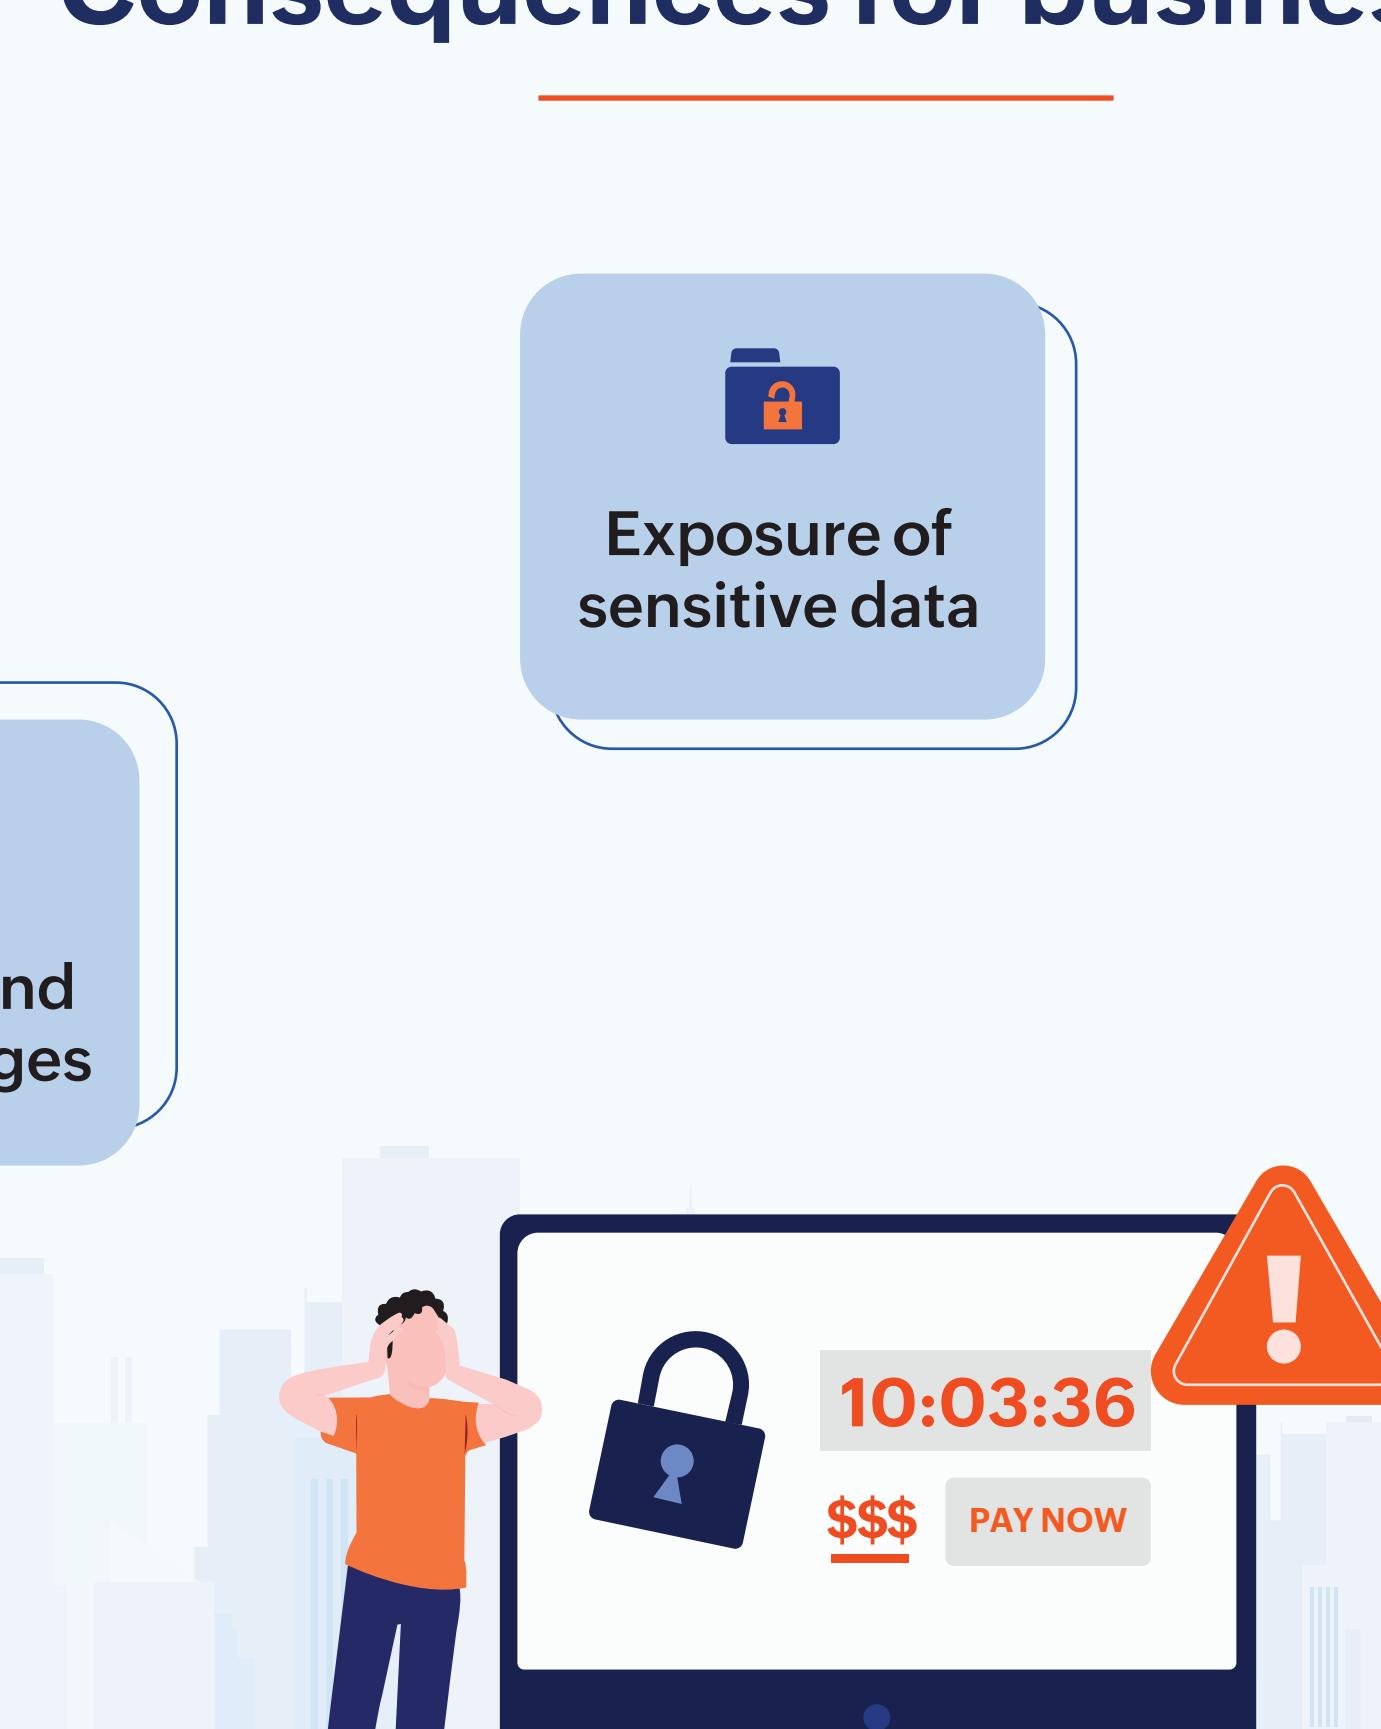

82% increase in ransomware globally with payouts averaging **\$500,000**.

4X increase in vulnerabilities tied to ransomware.

5 Ransomware attacks every minute globally

80% of the enterprises that paid a ransom were still hit by ransomware a second time.

236.1 million ransomware attempts were made in the first half of 2022 alone!

95% of cybersecurity problems are due to **human error**, according to the World Economic Forum's 2022 Global Risks Report.

Ransomware goes beyond the ransom

Plunge in brand value

Business disruption

Security breach

Exposure of sensitive data

Insurance and risk challenges

Supply chain risks

Why should you be concerned

The Industries Most Affected by Ransomware

Number of reported ransomware attacks worldwide by sector

Where is it heading

Ransomware has become an industry. It's more than just the final extortion.

The initial access broker

Threat actors that sell cybercriminals access to corporate networks.

Lateral movement

Broaden and cement that foothold of initial access whilst gaining further access to valuable data or systems.

Over 90% of ransomware attacks are preventable, a Gartner analysis indicates.

At least 75% of organizations will be targeted more than once by 2025.

700% increase in the number of ransomware attacks by 2025 is forecast.

Over 90% of ransomware attacks are preventable, a Gartner analysis indicates.

At least 75% of organizations will be targeted more than once by 2025.
