C015 - IA.1.076

Identify information system users, processes acting on behalf of users or devices.

✔ **Detailed Windows Logon Reports**

- Windows Successful User Logons
- Interactive Logon
- Remote Interactive Logon
- Network Logon
- Logon Attempt Using explicit Credentials
- Privilege Assigned to New Logon

✔ **Windows Events**

- User Based Activity

✔ **Unix User Account Management**

- Users Added
- Users Deleted
- Users Renamed
- Group Added
- Group Deleted
- Group Modified
- Password Changes
- Password Changes Failed
- Failed user additions

✔ **Detailed Network Device Logon Detailed**

- Successful Logons
- Failed Logons
- Logoff Events
- Successful VPN Logons
- Failed VPN Logons
- VPN Logoff

✔ **IAM Activity**

- IAM Errors
- IAM User Activities
- IAM Unauthorized Activities
- IAM User Report
- IAM Group Report
- IAM Role Report
- IAM Policy Report
- MFA Report
- Access Key Report

✔ **AWS User Activity**

- AWS User Activity

✔ **AWS Failed/Unauthorized Activity**

- AWS Error events
- AWS Login Failures
- AWS Authorization Failures

		<ul style="list-style-type: none"> ✔ Cloud User Login Activity <ul style="list-style-type: none"> • Successful Logins • Failed logins
<p>CO41 - SI.5.222</p>	<p>Analyze system behavior to detect and mitigate execution of normal system commands and scripts that indicate malicious actions.</p>	<ul style="list-style-type: none"> ✔ Detailed Windows Software Update Reports <ul style="list-style-type: none"> • Installed • Downloaded • Detected • Connectivity • Availability • Windows update process failed • Update Packages Installed ✔ Windows and software reports <ul style="list-style-type: none"> • Software Installed • Software Updated • Failed software installations • Failed software installations due to privilege mismatches • Non valid Windows license • Failed Windows license activations • Non activated windows products • New Kernel Filter Driver ✔ Process Tracking <ul style="list-style-type: none"> • Process Created • Process Terminated • Process Accessed • Process Duplicated ✔ Windows Services - Detailed Reports <ul style="list-style-type: none"> • Service Started • Service Stopped • Service Failed • New Service Installed ✔ Windows Threat Detection from Antivirus Detailed Reports <ul style="list-style-type: none"> • Threats Detections by ESET Endpoint Antivirus • Threats Detections by Kaspersky • Threats Detection by Microsoft Antimalware • Threats Detection by Sophos Anti-Virus • Threats Detection by Norton AntiVirus • Threat Detections by McAfee • Infected files detected by Symantec Endpoint Protection

ManageEngine
EventLog Analyzer

EventLog Analyzer is a web-based, real-time log management and IT compliance solution that combats network security attacks. With comprehensive log management capabilities, EventLog Analyzer helps organizations meet their diverse auditing needs. It also offers out-of-the-box compliance reports and alerts that meet stringent IT regulatory mandate requirements with ease. For more information about EventLog Analyzer, visit manageengine.com/eventloganalyzer.
