ManageEngine
EventLog Analyzer

EventLog Analyzer is a web-based log management solution that automates log collection, analysis, correlation, and archival process. The solution comes with more than 1000 predefined reports, 800 ready-made alert profiles, and over 25 predefined correlation rules that helps meet the auditing, compliance and security needs of enterprises. This solution is also capable of auditing business-critical applications such as SQL and Oracle databases, IIS and Apache web servers, perimeter network devices (such as firewalls, IDS/IPS, threat intelligence solutions), and user behaviors. Further, EventLog Analyzer has a best-in class log search engine that helps you with effective forensic analysis.
