

A reporting, change auditing, monitoring, and content search solution for Microsoft Exchange Server, Exchange Online, and Skype for Business Server

Comprehensive reporting

Get over 450 intuitive reports on various aspects of your hybrid Exchange environments and Skype for Business. Generate reports on objects from more than one server or tenant simultaneously.

Real-time change auditing

Audit Exchange events and user activities effortlessly. Track non-owner mailbox access, mailbox logon activity, changes to mailbox permissions and server configurations, and more.

Continuous service monitoring

Retrieve information about the health and status of endpoints and services in your Exchange servers. Monitor Exchange [email queues](#), DAGs, databases, servers, and more.

Instant mailbox content search

Perform pattern, attribute, and keyword searches in your organization's Exchange mailboxes. View email content in HTML format and download suspicious attachments for investigation.

With Exchange Reporter Plus, you can

Fetch insights on mailboxes

Keep a close watch on your organization's mailboxes by tracking size, growth over any specified period, property changes, mailbox-enabled users, inactive or hidden mailboxes, and more.

Stay notified about service health

Monitor the health of Exchange Server services and receive immediate notifications when services start or stop running. Keep track of the status of endpoints, databases, DAGs, storage, and emails too.

Track deleted or moved emails

Locate all the emails that were deleted or moved from the mailboxes in your organization, right down to the names of the source and destination folders. This proves helpful in recovering the required information immediately.

Analyze Exchange email traffic

Get complete email traffic statistics for your Exchange servers. Stay informed about the number and size of messages that go in and out of your organization, email delivery times, undelivered emails, and more.

Audit and track mailbox logons

Avoid data loss and policy violations by tracking non-owner accesses to mailboxes. Use the non-business hours filter to narrow down the suspicious logins and prevent possible attacks.

Create and schedule custom reports

Create your own Exchange reports and audit, monitoring, and content search schedules. Send detailed information and alert notifications to all stakeholders via SMS and email automatically at the desired intervals.

Other key features

- Exclusive compliance reports for [SOX](#), [HIPAA](#), [PCI](#), and [GLBA](#)
- [Audit](#) logs storage for an indefinite period
- Real-time SMS and email alerts
- SIEM integration and log forwarding
- Customizable [dashboard](#) and snippets
- Custom role-based delegation
