

## TRAFFIC & BANDWIDTH MONITORING

REAL-TIME ANALYSIS

VISIBILITY  
IS  
POWER

IT networks have evolved as the backbone of businesses. Anything that affects the stability of your network, directly impacts your business. Cutting-edge visibility into the network is mandatory to exercise complete control on it and we help you get that visibility in real-time by using the latest and the most advanced technologies in the market, so that you get empowered with all the control that you need to keep your business continuity intact.

## Highlights

- Real-time flow-based traffic analysis
- Supports all major flow formats(IPFIX, sFlow, j-Flow, cFlow, AppFlow, traditional & flexible NetFlow)
- Reports on Quality of Service through Cisco CBQoS
- Application visibility through reports powered by Cisco NBAR & Cisco AVC modules
- Visibility into parameters pertaining to voice, video & data through Cisco IP SLA & Medianet media monitoring technologies
- Complete network security analysis reports with our own Advanced Security Analytics module
- Customizable Dashboards & Privileged-based user access

### IVT Completed:

- NetFlow
- WAAS
- IP SLA
- Medianet 2.0

// The entire ManageEngine NetFlow Analyzer team is dedicated to improving the product by adding new features, not just fixing bugs! We are always excited about receiving new features and benefits as the software matures which provide our customers even greater analytical information into their data usage on our network //
