

An integrated Active Directory self-service password management and single sign-on solution.

Empower
end users.

Improve
security.

Reduce
costs.

Benefits

Immediate ROI

Provides immediate return on investment by eliminating password-related tickets and calls to the help desk.

Improved Productivity

Improves employee productivity, as they can immediately regain access to their systems without relying on the help desk.

Enhanced Security

Improves security across on-premises and cloud applications through strong universal password policies.

One Password

Keeps users happy as they no longer have to remember multiple complex passwords.

ADSelfService Plus Highlights

Self-service Reset Password and Account Unlock

Allow users to reset passwords and unlock their on-premises and cloud application accounts securely without help desk assistance.

Multi-platform Password Synchronizer

Automatically sync Active Directory passwords in real-time across multiple on-premises and cloud applications.

Password Expiration Notification

Send timely reminders about impending password and account expirations via email, SMS, and push notifications to alert users to change their domain passwords.

Single Sign-on for 100+ Cloud Apps

Streamline and secure access to cloud applications with Active Directory-based single sign-on and let users enjoy consistent logon process across apps.

Granular Password Policy Enforcer

Enable granular password policies across Active Directory and other connected on-premises and cloud applications.

Self-directory Update and Employee Search

Allow users to update their profile details in Active Directory and also search for their colleagues' information.

Two-factor authentication for Windows logons

Secure both remote and local accesses to Windows using two-factor authentication.

ADSelfService Plus is a tool that we consider indispensable. It is the right tool for the job. Our password reset requests are nearly zero. This frees up IT and management as well as employees to be more productive. Any company that relies on Active Directory authentication with password expiry will benefit from using it. The price is also right. ”
