

Self-service password management with ADSelfService Plus

Reduce help desk tickets and improve employee productivity

Password management: Unwarranted overhead cost and security risk

Gartner®

According to the Gartner Group, around

20% to 50%

of all help desk calls are due to password resets.

FORRESTER®

Forrester Research states that resolving each password reset request costs companies

around \$70 on an average!

Are your...

Help desk tickets primarily forgotten passwords and locked out accounts?

Users struggling to remember different passwords for multiple enterprise apps?

Users constantly creating weak passwords and putting your company at risk?

Users forgetting to change their Active Directory passwords on time?

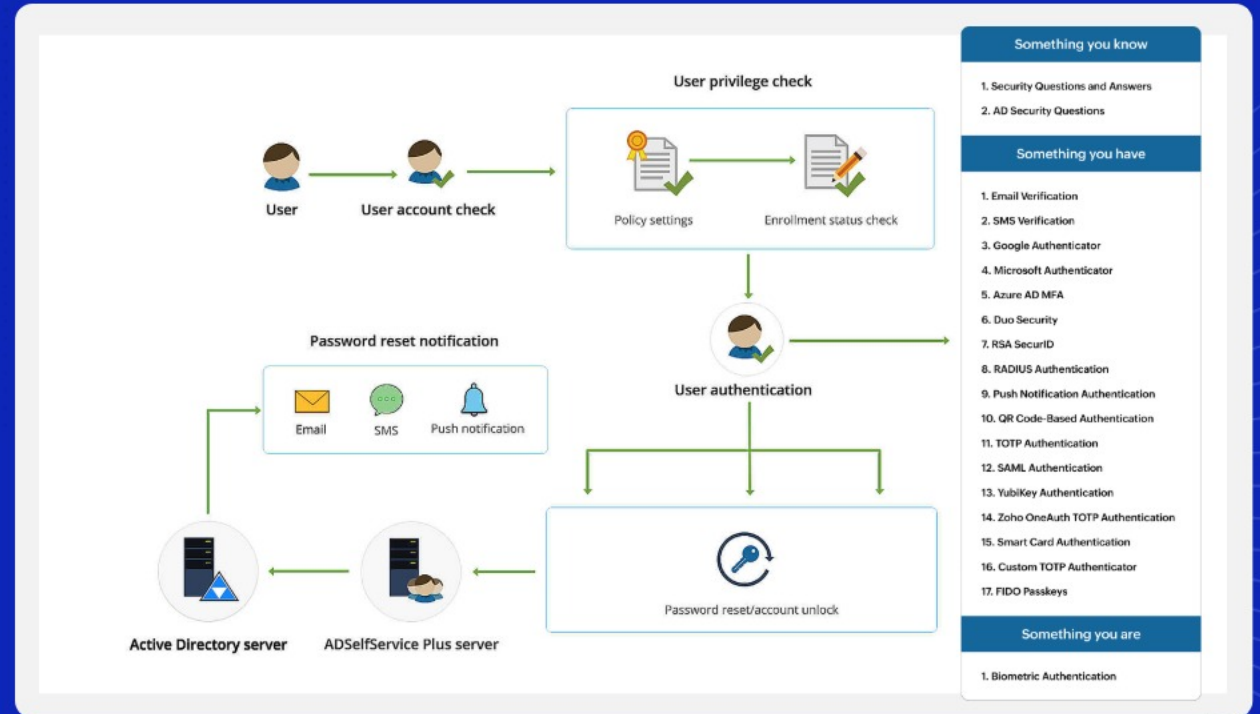

ADSelfService Plus

is the right solution for you!

ADSelfService Plus, an identity security solution, provides **secure self-service password management** to reduce help desk tickets and improve password security.

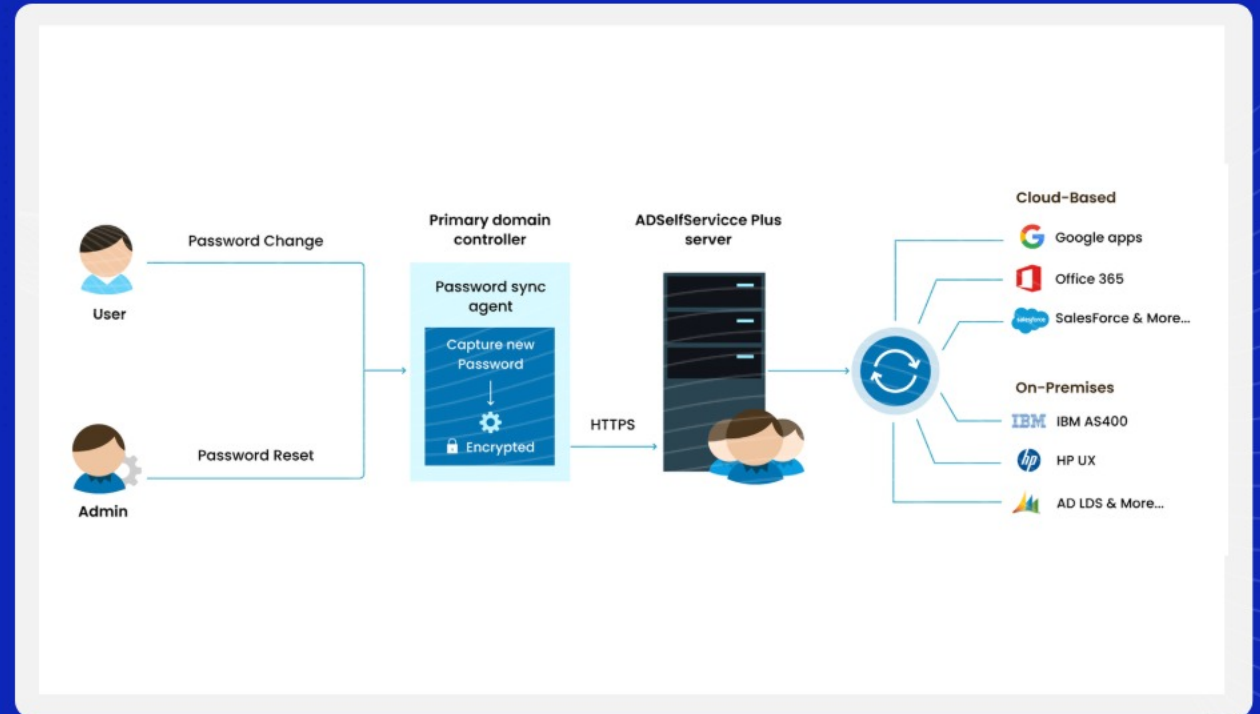

Password self-service

- ADSelfService Plus empowers end users with web- and mobile-app-based **self-service password reset, password change, and account unlock**
- All end user self-service actions are secured with modern MFA methods
- A user can reset their password and unlock their account right from their login screen

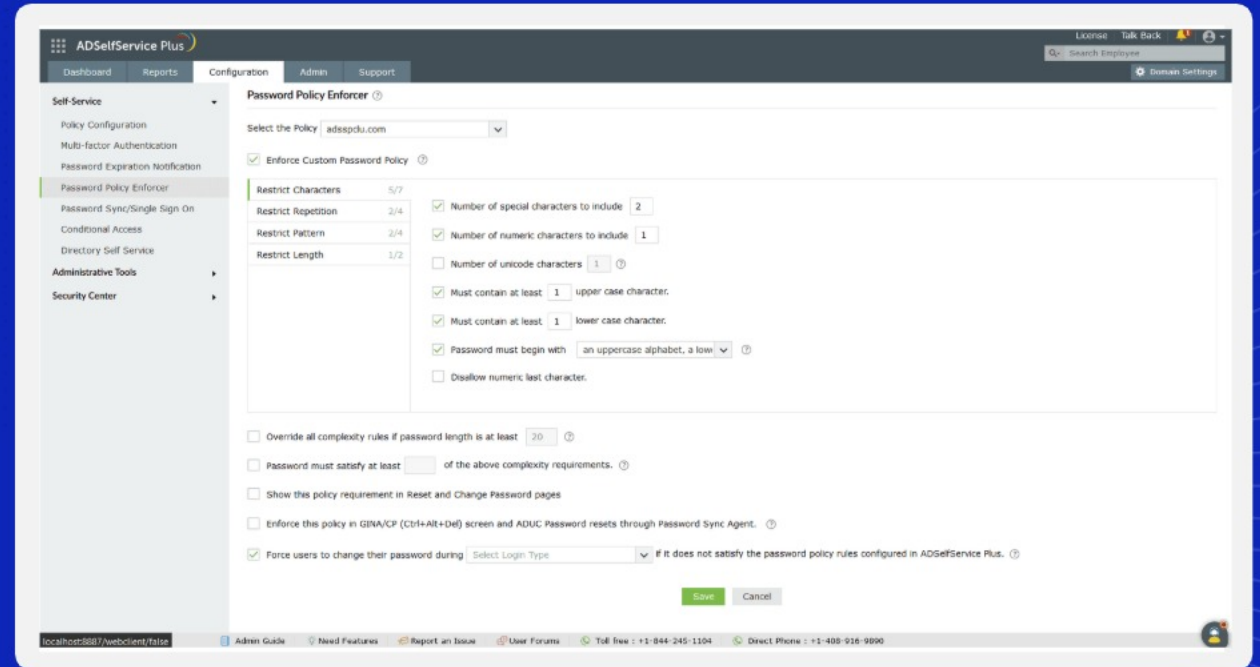

Password sync

- ADSelfService Plus offers **password synchronization** that seamlessly replicates Windows AD password and account changes across a wide range of cloud and on-premises applications.
- The password synchronization process is real time and customizable.

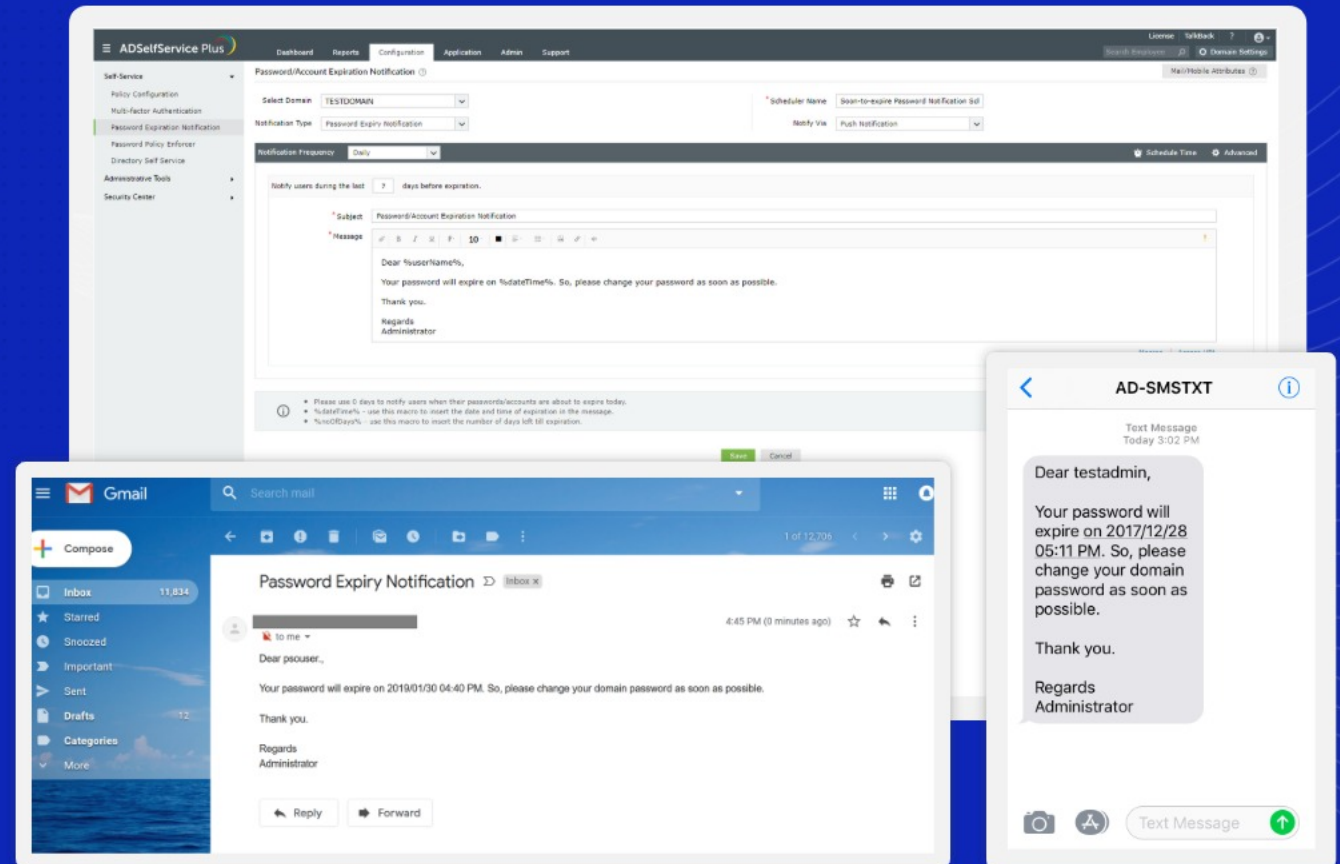

Password policy enhancer

- ADSelfService Plus helps enforce strong, compliant user passwords.
- Supports granular settings:
 - ✓ Restrict number of special characters, numbers, and Unicode characters
 - ✓ Limit repetitions and sequences
 - ✓ Block dictionary words, palindromes, and enforce regex patterns
 - ✓ Set password length rules and complexity bypass options
- You can restrict breached passwords via **HavelBeenPwned** integration.

Password expiration notifications

- ADSelfService Plus provides **password expiry SMS and email notifications** for your users to promptly change their AD passwords
- The notifications are phased and can be customized to suit your organizational needs
- You can also notify users and their managers about account expiration

Switch to **ADSelfService Plus today**

and **enjoy enhanced identity security for your organization!**

Guaranteed ROI

ADSelfService Plus gives you an immediate ROI by nearly eliminating password-related tickets.
