

Enterprise single sign-on (SSO) with ADSelfService Plus

Secure and streamline enterprise application access

Life without SSO would be tiresome indeed!

Did you know?

Did you know that **69%** of employees switch between ten apps every hour on average, and about **65%** of employees use the same or a similar passwords on multiple apps!

Without SSO

your employees have diminished productivity and are more likely to forget passwords or set unsecure passwords.

ADSelfService Plus to the rescue!

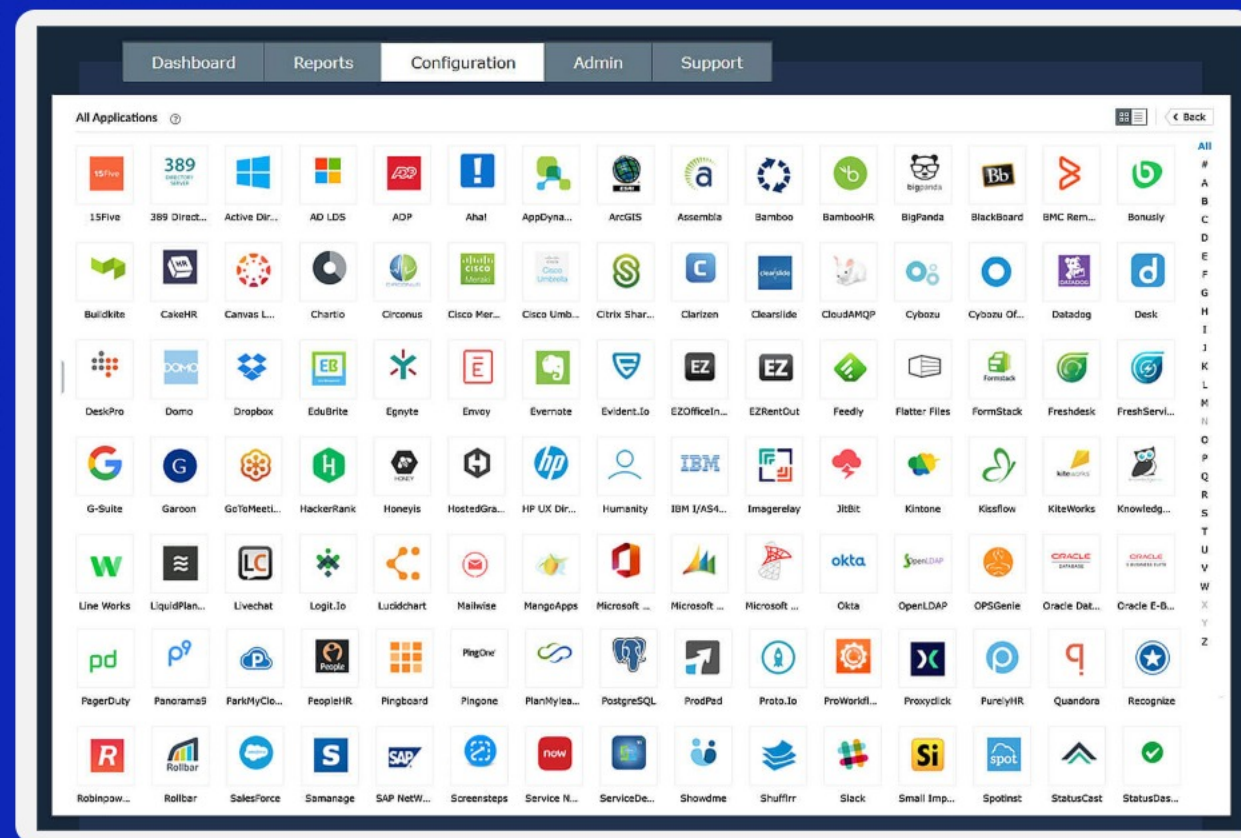

SSO with ADSelfService Plus:

- Eliminates password fatigue
- Adds security
- Saves time and money

ADSelfService Plus' SSO includes Passwordless authentication

- SSO for established cloud applications
- SSO for custom enterprise applications
- SAML- and OAuth/OpenID Connect-based applications
- IdP- and SP-initiated SSO flows
- Passwordless authentication
- Bookmark functionality for seamless access to applications that do not support standard SSO protocols like SAML, OAuth, or OIDC.

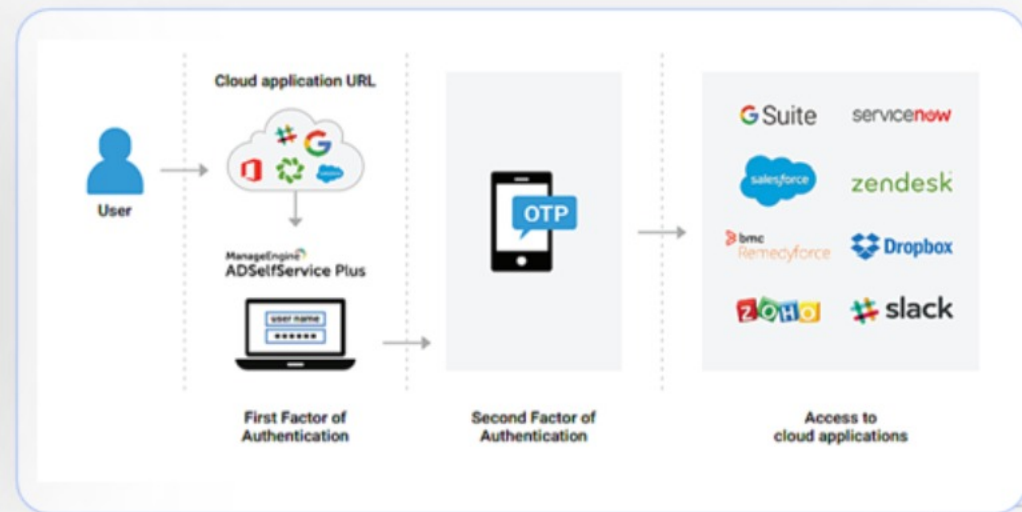

ADSelfService Plus secures SSO with adaptive MFA that includes 20 different authenticators!

Here's how single sign-on works in ADSelfService Plus

During IdP-initiated logins

During SP-initiated logins

Switch to **ADSelfService Plus today**

and **enjoy enhanced identity security for your organization!**

Guaranteed ROI

ADSelfService Plus gives you an immediate ROI by nearly eliminating password-related tickets.
