## ManageEngine Enables Mobile Access to On-Demand IT Help Desk Application

AUSTIN, Texas --(Business Wire)--

[ManageEngine](#), makers of a globally renowned suite of cost-effective network, systems, security, and applications management software solutions, today announced support for mobile access to [ServiceDesk Plus On-Demand](#), the ITIL-ready, cloud-based help desk and asset management solution. Help desk personnel can now access ServiceDesk Plus On-Demand at any time and from anywhere using popular mobile devices, such as the iPhone, the iPad, and Android ([News - Alert](#))-based smartphones.

In today's IT service management scenario, the need for IT service desk teams to support geographically distributed users - many mobile and untethered - is an imperative. IT support teams never know when, or from where, a critical support request is going to arrive, which is why it is so important for IT support personnel to be able to interact with the help desk software and manage their help desk tickets with the at-anytime and from-anywhere responsiveness that mobile devices can enable.

"At ManageEngine, it is important to us to ensure that our increasingly mobile customers have 24x7 access to the key functionality of their IT help desks," said Rajesh Ganesan, director of product management at ManageEngine. "The ability to access ServiceDesk Plus On-Demand from a mobile device firms up our commitment to establish quicker and more effective channels of interaction between users and the service desk. Mobile access can help improve response times, and it can help IT personnel report on and resolve incidents more quickly and more flexibly - and that translates directly into greater cost-efficiencies and user satisfaction."

### Enabling a More Nimble IT Response

With its SaaS ([News - Alert](#)) delivery model, ServiceDesk Plus On-Demand already offers multiple benefits to IT managers, relieving them of cumbersome tasks like installation and maintenance, as well as application management chores normally associated with installed on-premise applications. The introduction of the mobile interface is a step forward in freeing IT help desk users from the burden of being tied down to their desks to access their help desks.

Because there is no additional application software to install, ServiceDesk Plus On-Demand can take the interaction between users and IT support teams to a whole new level, improving service delivery standards and increasing customer satisfaction.

### Multi-Language Capability

Along with the mobile interface, ManageEngine also announced the multi-language support capability for ServiceDesk Plus On-Demand. Since its release almost a year ago, the popularity of ServiceDesk Plus On-Demand has surged around the globe. To meet the needs of a diverse and global user base, ManageEngine has
