## Monitor, manage, and secure your clients' environment efficiently

ManageEngine Log360 MSSP watches over your network, endpoints, and cloud applications, keeping them safe from a multitude of threats. Being a unified SIEM solution with integrated DLP and CASB capabilities, Log360 MSSP assists MSPs to protect their clients' businesses from cyberattacks, ensure compliance, and avoid costly penalties while empowering their security team to work efficiently.

### Why choose Log360 MSSP?

- ✔ **Proactive threat detection:**  
Detects and prioritizes threats early with real-time threat intelligence and advanced threat analytics.
- ✔ **Automated threat response:**  
Remediates threats quickly with automated remediation, guided investigations, and threat hunting.
- ✔ **Seamless compliance management:**  
Simplifies compliance audits with audit-ready reports, continuous monitoring, and secured data retention.
- ✔ **Comprehensive network auditing:**  
Audits critical infrastructure—Active Directory, IIS & Apache web servers, SQLs, and cloud platform.

### How is Log360 MSSP different?

- ✔ **Varied deployment options:**  
Available as cloud-based and on-premises SIEM solution, catering to clients of varied sizes.
- ✔ **Reduced IT costs:**  
Log360 consolidates multiple security functions—data loss prevention, cloud security, threat intelligence, and more, into one platform, saving you money and simplifying management.
- ✔ **Increased operational efficiency:**  
Automated tasks and real-time insights enable your security team to work smarter, not harder.
- ✔ **Client-specific customization:**  
Tailor security strategies based on the unique requirements of clients.

### Key features of Log360 MSSP

- ✔ **Multi-tenant architecture:**  
Use a single console to assess and manage multiple client environments.
  - ✔ **Log management and analysis:**  
Analyse logs from over 700+ sources and gain deeper insights with predefined reports.
  - ✔ **Client-specific reporting:**  
Strategize security plans for individual clients based on client-specific security reports.
  - ✔ **Compliance assistance:**  
Simplify compliance management with audit-ready reports for all major compliance standards.
-
