NetFlow Analyzer

---

# ManageEngine NetFlow Analyzer Professional Edition Training

- I. Course Objectives
- II. Who Should Attend
- III. Course Agenda

## Course Objectives

NetFlow Analyzer Professional Edition training shortens the learning cycle and makes your network staff manage your network more productively right away. At the end of this course you will be able to use NetFlow Analyzer Professional Edition to:

- Monitor traffic and bandwidth in your enterprise network
- Create IP groups to easily monitor various elements of your network
- Make accurate capacity planning decisions

## Who Should Attend

- Network Administrators who are responsible for the Network Performance
- Network Team members who are responsible for monitoring the network bandwidth
- IT heads who want to take capacity planning decisions

## Course Agenda

The training will cover:

- Overview of NetFlow Analyzer Professional Edition
- Installing NetFlow Analyzer
- Implementing a traffic analysis solution with NetFlow Analyzer
- Backup and maintenance procedure

## Introduction to NetFlow Analyzer

- NetFlow Analyzer overview
- Benefits of NetFlow Analyzer
- Features in NetFlow Analyzer

## Installing NetFlow Analyzer

- Supported OS
- Minimum Hardware Requirements
- Supported Browsers
- Installation procedure
- Free ports for NetFlow Analyzer to use
- Starting as Windows Service

---

## Implementing a traffic analysis solution with NetFlow Analyzer

- **Troubleshooting**
  - Drill down to the source of the incidents rapidly
  - Do faster troubleshooting with all the data needed readily available
- **Application performance tracking**
  - Monitor the performance of the applications in your network
  - Ensure vital applications get the optimal bandwidth at all times
  - Categorization and reporting on custom applications
- **Network security**
  - Track host-based and user-based network activity
  - Track application-wise and port-wise network activity
- **Efficient capacity planning**
- **Department / Division based traffic analysis**
  - Department / division based traffic analysis
  - Advanced filtering available in IP groups
- **Proactive monitoring**
  - Setting user defined thresholds
  - Automated report generation
- **Privilege based user access**
  - Create user roles and assign appropriate access rights
  - Restrict access based on user role to ensure security

### Data Storage, System Maintenance and Backup

- Store aggregated flow data forever
- Vital parameters to check in NetFlow Analyzer installation
- Backup and restore procedures

### Licensing

## About ZOHO Corporation

ZOHO Corporation provides affordable software for management and provisioning of complex networks, systems and IT applications. With a broad product portfolio and an active customer base ranging from enterprises, equipment vendors and service providers, ZOHO Corp. has emerged as a very affordable and high-quality alternative to expensive software that is common in this industry. ZOHO Corp. is headquartered in Pleasanton, CA with offices in NJ, NH, India, UK, China and Japan. It has a well-trained partner base around the globe and thousands of customers world-wide.
